The Alabama Department of Agriculture and Industries and the Alabama Field Office of USDA/NASS are proud to present the 47th edition of *Alabama Agricultural Statistics*. The numbers contained in this publication are a testimony to the importance of agriculture in this state. Agriculture is the No. 1 industry in Alabama. Agriculture receipts for 2004 total over \$5 billion, with over \$40 billion impacting our state's economy. The agriculture industry employs over 467,000 people, constituting 21% of the state's workforce.

Not only do farmers provide the food and fiber we need, they will be an important asset in the future when it comes to special projects like finding alternative fuels. Alternative fuels will be derived from corn, soybeans, switchgrass, and other biomass, all products produced by Alabama farmers.

Some of the best agricultural products in the world are grown or produced right here in Alabama. I am committed to helping our farmers and producers maintain their success in the coming year. In this issue of *Alabama Agricultural Statistics*, we pay tribute to Alabama's farmers.

Ron Sparks
Commissioner

Alabama farmers are truly the backbone of this bulletin. Without their willingness to spend time with our enumerators in completing agricultural surveys, the story of Alabama's agriculture would not be told accurately. This edition honors both our farmers and our enumerator corps who work closely with them.

My personal thanks goes out to Alabama farmers, our enumerators, and the State office staff for preparing this issue of *Alabama Agricultural Statistics*.

Herb Vanderberry
Director

State Highlights for 2004-2005:

- Total farm and forestry receipts were over \$5.50 billion for the year.
- Cash receipts from farm commodities totaled \$4.10 billion, versus \$3.55 billion the previous year.
- The top five farm commodities for cash receipts were: (1) poultry, (2) cattle and calves, (3) greenhouse, sod, and nursery products, (4) cotton and (5) peanuts. Together they make up 90 percent of the total commodity receipts.
- Livestock and poultry accounted 82% of the cash receipts and crops the other 18%.
- Poultry made up 66 percent of the total cash receipts for all commodities (excluding forestry).
- Alabama ranked 3rd in broiler production with marketings of 1.05 billion birds.
- Laying flocks produced 2.10 billion eggs to rank 13th in egg production.
- Cattle inventory on January 1, 2005 was 1.32 million head and the state ranked 26th nationally.
- Catfish sales amounted to \$101.2 million. Alabama ranked second behind Mississippi in sales.
- Principal acreages for crops were: cotton (550,000), corn (220,000), peanuts (200,000), soybeans (210,000), and wheat (120,000).
- Alabama ranked 3rd in peanuts and 9th in cotton production.
- The state was 6th in pecan production and 9th in peach.
- Alabama ranked 2nd in commercial forest land, with 22.9 million acres.

Despite hurricane Ivan, which hit Alabama's Gulf Coast on September 16 and caused extensive property and tree damage, 2004 was a very good crop year. Ivan took its toll on many of the more mature **cotton** fields in the southwestern part of the state blowing much of the cotton lint to the ground. However, for the state as a whole, the effect was minimal and estimated yield fell only slightly below last year. Yield was 729 pounds of lint per acre compared to 772 pounds per acre the previous year and the ten year average of 607 pounds per acre. A few **corn** fields were not harvested before Ivan struck and were completely destroyed. Overall, however, Alabama posted a record corn yield of 123 bushels per acre. The ten year average is 88 bushels per acre. Production came in at 23,985,000 bushels, 805,000 bushels more than in 2003. Except for delaying harvest in some fields, the hurricane had little effect on the **peanut** crop. The major portion of the peanut crop is grown in the southeastern part of the state, but in recent years more and more acres have been planted in the southwestern area where peanut production increased from 21 percent of the total in 2003 to 37 percent this year. Production came to 557.2 million pounds and yield was 2,800 pounds per acre. This was 50 pounds per acre above 2003, 602 pounds per acre more than the ten year average but down from the record of 2,960 pounds per acre set in 1984. While some **soybean** fields were blown down by hurricane Ivan, the rains were a help to younger soybeans. Some soybeans molded in the field due to wet weather late in the harvest season. Total soybean production, at 6.65 million bushels, was up from the previous year while the yield of 35 bushels per acre was one bushel below the 2003 record yield of 36 bushels per acre. The ten year average is 26 bushels per acre. **Hay** fields received sufficient rain and condition averaged 60 percent good to excellent through the growing season. Yield, at 2.7 tons per acre tied the record yield set in 1994; it is up 0.1 ton per acre from the 2003 yield and 0.4 ton per acre above the ten year average yield. As in 2003, excessive moisture caused much of this year's **Irish Potato** crop to rot and go unharvested. A few growers did not plant this year due to poor prices. Planted area was down 700 acres from last year with only 1,300 acres harvested of the 2,300 acres planted. Yield is 175 cwt. per acre, 10 cwt. per acre below the 2003 yield but 10 cwt. per acre above the ten year average. Of the 2,800 acres of **sweet potatoes** planted, 2,300 acres were harvested. Some fields were not harvested due to wet weather and excessive weed growth. The average yield, at 165 cwt. per acre, was 25 cwt. per acre less than last year's 190 cwt. per acre and 1cwt. per acre less than the ten year average. **Winter Wheat** yield was 48 bushels per acre, 6 bushels above 2003 and 6 bushels below the 2000 record yield.

*These 15 commodities accounted for nearly 92% of Total Farm & Forestry Receipts.

For counties with limited production of a specific commodity, cash receipts (starting on page 46) for that commodity are not published, but are included in the county's Total Farm Receipts. USDA's Farm Service Agency (FSA) supplied information on government payments and stumpage revenue for farm forest products and non-farm commercial timber was provided by the Alabama Forestry Commission. Other farm income includes money received for machine hire and custom work, custom feeding fees, and other farm business-related income. These receipts are not published separately but are included in each county's Total Farm Receipts.

The 2002 Census of Agriculture was taken to obtain Agricultural Statistics for Alabama and each county in the state, as well as every county and state in the Nation. The 2002 Census introduced new methodology to account for all farms. All Census items published for 2002 were adjusted for undercoverage. To provide comparable data, 1997 Census data were also adjusted.

The Census data provided in this bulletin (pp 94-96) represent only a small portion of the total information collected and published in the 2002 Census of Agriculture. Log onto our website (<http://www.usda.gov/nass/>) and click on "Agriculture Census" to see all the census numbers for the U.S. and each state, including Alabama.
