SIXTEENTH ANNUAL ANNOUNCEMENT.

The Central Alabama Agricultural School and Experiment Station of the Ninth Congressional District is a scientific institution established by an act of the legislature of 1896-1897 and amended by the legislature of 1902-1903. The school is managed by a Board of Control, composed by the Governor, Superintendent of Education, and Commissioner of Agriculture and Industries, and two men of the same Congressional District as that of the school, appointed by the Governor.

OBJECTS OF THE INSTITUTION.

1. To turn out young men well grounded in the underlying principles of scientific and practical agriculture, that they may make successful planters and advance the farming interests of the State.

2. To educate and fully equip young men and women for efficient teaching in the public schools of the State.

3. To prepare those who desire to enter the Junior Class at our A. & M. College at Auburn or any other institution of similar grade.

4. To give a thorough, practical education, and to instill within them a broad and correct idea of American citizenship.

EXPERIMENT STATION.

It is the purpose of the Institution that the Experiment Station be used by the farmers of the district in order to find out the following subjects and in addition any other things which may come before them in order that they may get the full benefit of all the information at the hands of the authorities. The students will also investigate by coming in actual contact with the following

subjects:

- (1) Chemical Needs of the Soil.
- (2) How to remedy the defects of the Soil.
- (3) To improve worn Soil.
- (4) Variety tests of Corn and Cotton.
- (5) Fertilizer tests of Corn and Cotton.
- (6) Rotation of Crops.
- (7) Practical investigation in methods of Cultivation.
- (8) Floriculture and how to beautify the home.

In this connection there will be placed in operation during the Fall months a winter garden which will be attended to by the students under the direction of the President. During the winter months a short course in manuual training will be given and in the Spring it is the hope of the faculty that the school may have on its grounds a model home garden which will in a great measure make the life of the farm not a hap-hazard but a thorough and scientific life.

The authorities of the school are constantly receiving from the various Agricultural Schools and Experiment Stations bulletins on every subject which pertains to the farm. These bulletins can be obtained by writing to the President who will take pleasure in sending them to all who desire them.

PRACTICAL ADVANTAGES.

At the last session of the Legislature of the State an additional appropriation for the maintenance of the school as well as a certain amount for the improvement of the buildings was appropriated for the purpose of placing in the curriculum manual training and Domestic Science. In order that we may get into shape for use of this amount

when it does become available the students of the school will be required to do some practical work in the school garden located at the school building. It is the purpose of those in charge that this work be done under he supervision of the authorities. While this work is primarily for the boys, still the girls will be amply cared for in their work of Floriculture and in the course in needle work under the direction of Miss Finley. In this way the actual benefits to be derived from the school as an Agricultural school may be realized. The students will be required to plan and cultivate the garden at the school.

The result of this will be that the boys and girls when they return to their respective homes will be enabled to assist their parents more in the arrangement as well as the care of the home and its surroundings.

LOCATION.

Blountsville is a cultivated town in Blount County, Alabama. It has long enjoyed an enviable reputation for healthfulness, refinement and culture. Being situated in the highlands of North Alabama, with natural drainage, it is free from malarial troubles and the depressing influences of places not so highly elevated above the sea level. This, together with its invigorating air and pure cold water, is a material element in school work.

Blountsville is ten miles east of Garden City, a station on the Louisville & Nashville railroad.

That a location removed from the railroad and bustle of our business centers is the most favored for intellectual and moral achievement, is conceded by all thoughtful people. Blountsville is absolutely free from saloons and the numerous other snares which have entrapped and ruined thousands of our young men in the formative period of

life. Without these destructive forces, this location affords superior facilities in educated, refined society, in Sunday School and Church privileges and everything that will aid the school in building up strong and noble characters—characters fraught with positive convictions of duty to themselves, their country and their God.

With the above advantages, together with others that could be named, we do not exaggerate when we say that all who sojourn with us as pupils will enjoy the pleasure of being in one of tho loveliest towns of the State.

The main building is located on an eminence overlooking the valley in which the town is and is comfortable, well ventilated and well equipped for work to be done by the student body. The campus has been improved and beautified during the past session and will be the pride of each and every student of the school.

Our school is open to both sexes, and furnishes a similar course of study to boys and girls, adapted to their different callings in life. The instructors of the institution are firmly fixed in their opinion that it is far better that boys and girls should be educated in the same school. While it has refining influence on the boy, the girl is made stronger by the mental combat with the opposite sex. The great educational success achieved by the larger number of co-educational institutions all over the country is proof that the principle here advocated is not a mere fancy of ours. The training of boys and girls together has long since passed the experimental stage.

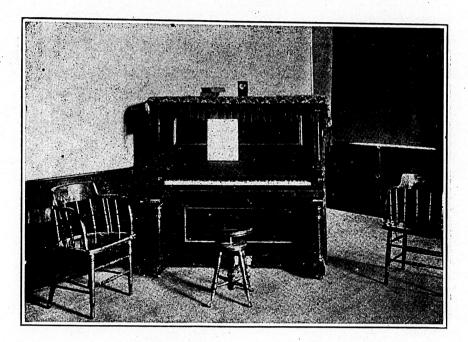

RELIGIOUS INFLUENCES.

The opening exercises each day are both devotional and literary. The leading Christian denominations are

9

well represented in Blountsville, with neat and attractive places of worship, an intelligent ministry and refined congregations. Flourishing Sunday Schools are also maintained.

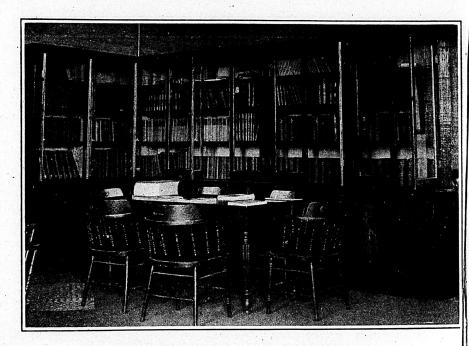

Boarding pupils will be required to attend Sunday School and preaching at least once each Sunday morning. As the school is strictly non-sectarian, pupils will attend the church of their choice. Young Men's and Young Women's Christian Associations are maintained.

CORNER OF THE MUSIC ROOM

LITERARY SOCIETIES

There are two Literary Societies the membership of which embraces every student in the school-the Henry Grady and the Frank Burns. All pupils, both young men and young women are required to affiliate with one of these Societies on entering school and must take an active part in the deliberations. Meetings are held Tuesday afternoon of each week and such programs are rendered as are conducive to the Social, Intellectual and Moral devel-

A CORNER OF THE LIBRARY

opment of the members. While these Societies are supervised by the Faculty, they are presided over and officered by the Student Membership.

In addition to the above named Societies a Society was organized by the young men for them exclusively which is to meet on each Saturday night in the Chapel at which time a fitting Program is rendered. This, the Free and Easy Oratorical Society, has for its object that broadening and elevating influence which serves to make for the young men who are the members, an easy manner and the ability to study and put in practice those parlimentary laws so necessary for all assemblies. A handsome prize is offered each year by Mr. J. H. Julian, of Louisville, Ky., and was won by Mr. William Sizemore of the class of 1913.

EXPENSES FOR THE HALF SESSION.

Tuition is absolutely free but a fee of \$4.00 per term of four and one-half months is charged to supplement the state appropriation to defray the running expense of the school. Also a Library fee of fifty cents per term is charged for the support of this indespensible feature of the school. This makes a total of \$4.50 per term. These fees must be paid at the time of entering and before assignment to any class.

Good board may be secured from private families at from \$10.00 to \$12.50 per month. The president and faculty will have personal supervision of all boarding pupils. The authorities will have the co-operation of the people of the town and all pupils will be required to keep such study hours as will enable them to prepare themselves for the

work in hand. Any student who willfully neglects his or her duty in this respect will be subject to such "Extra Duty" as may be required by the authorities.

ENTRANCE EXAMINATONS,

Entrance Examinations will be held in the College Chapel on Tuesday, September the 3rd. Candidates for admission will be required to stand satisfactory examinations in such subjects as the Examining Committee may see fit to impose. It is necessary that a person should enter the school at the beginning of the Session as the class will have completed work which will be missed sadly by a late entrant. Those entering after the beginning of school will be repuired to stand a satisfactory examination on that part of the study completed at the time of entrance.

ATHLETICS.

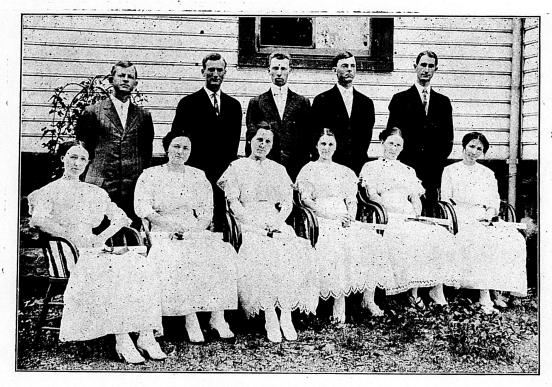

It is the policy of the school to give reasonable encouragement to athletics. The best school authorities in the land advocate the employing of different forms of athletics for the proper physical, mental and moral developement of the pupils.

LIBRARY.

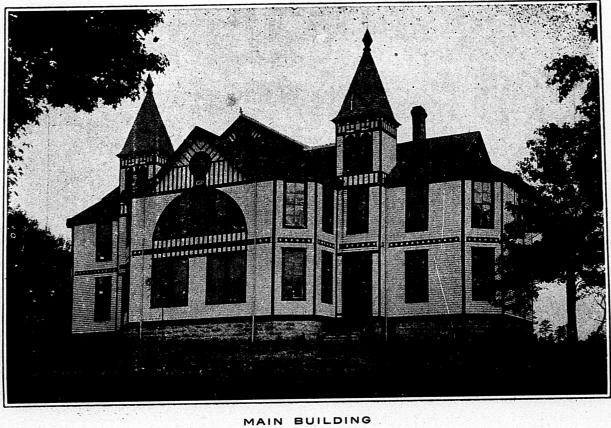

Arrangements have been made for the increased supply of books and periodicals for the excellent library which is in the main school building. Daily papers and periodicals will be found at all times on the tables and the pupils will be directed in their reading by the faculty.

BOOKS.

The State adopted books are kept at the local depository, and can be secured at the least possible expense.

SENIOR CLASS--1911-12

The names of all texts with authors may be found in the list of studies.

DISCIPLINE.

The government of the school, while being placed under the direct supervision of the President, is in the hands of a Disciplinary Committee of the Faculty who see that the rules of the school are observed and that the proper

MORGAN COUNTY CLUB

respect is maintained by the student body for the regulations.

Students are prohibited from having in their possession arms or weapons, and also from using or causing to be brought into the community intoxicating liquors. When a student desires to resign his duties in the school he will be permitted to do so if he presents a legal excuse; but under no ordinary circumstances will he be permitted to resign near a general examination. Those students who willfully and without proper excuse absent themselves from examination shall be dismissed from the student body and not allowed to re-enter until they have made satisfactory arrangements to make up the work.

CITY PUBLIC SCHOOLS

Realizing that there are a great many families in which not all the children are ready for the Agricultural School, we call especial attention to the excellent City School of Blountsville. It is well graded, has excellent teachers, and is the pride of the town. The principal, Mr. Henry Hood, and the assistant, Miss Nora Ketchum, are both graduates of the Agricultural School and have both been students of the University of Alabama. Mr. Hood is one of the leading teachers of the county and a man of no small experience.

A pupil who finishes in the elementary studies in the public school is able, by presenting a certificate of attainment issued by the principal of the public school, to enter the seventh grade of the Agricultural School and take the higher course given.

EXAMINATIONS, REPORTS, RECORDS.

Examinations will be held at the end of each quarter of nine weeks. These examinations will be averaged with the daily grade of the pupils and given to him for his record book which will be placed in the hands of each pupil at the end of the first Quarter. These records are to be presented to the parents for their signature and returned to the President of the school for future use. Any person making a general average of 90 per cent on the first three quarters and having a daily grade on the last quarter of 95 per cent will be excused from examinations at the close of the school and will be placed with the honor students for the Session.

THESIS.

6

Each member of the Senior Class will be required to write a thesis on some Agricultural subject to be approved by the President and presented to the Faculty by April 1st. Essays must also be written by the members of the Junior and Senior classes and presented by the end of each quarter. These Essays are to be rendered publicly at a time to be selected by the Faculty. Anyone deficient in this work shall not be eligible for graduation.

DIPLOMAS.

A diploma of graduation will be given to all who have completed to the satisfaction of the Faculty the course of study as is adopted for the school.

Two hours additional practical work in some phase of Agriculture or Farm Mechanics will be required of boys and two hours additional in Cooking and sewing will be required of girls. The text books used in this connection will be as follows: For First and Second Years, Progressive Lessons in Needle Work by Catherine F. Johnson, D. C. Heath & Co.; for Third and Fourth Years, Elements of Theory and Practice of Cookery by Mary E. Williams and Catherine R. Fisher.

In course of English, pupils will be required to read College Entrance Requirements or Equivolent Classics.

Penmanship and Spelling will be required throughout the course.

ATTENDANCE HONOR CLASS

AGRICULTURAL CLASSICAL COURSE

This course will be the same as the Agricultural Scientific Course, with the following exceptions:

In the First Year, Pearson's First Year Latin will be substituted for Geography and History.

In the Second Year, Allen and Greenough's Caesar will be substituted for Arithmetic and History.

In the Third Year, Allen and Greenough's Cicero will be substituted for History and Physics.

In the Fourth Year, Virgil will be substituted for History and Civics.

Two hours additional work in some phase of Agriculture or Farm Mechanics will be required of the boys, and two hours additional in Cooking and Sewing will be required of the girls.

The text books in Cooking and Sewing are:

First and Second Years, Progressive Lessons in Needle Work by Catherine F. Johnson.

Third and Fourth Years, Elements of the Theory and Practice of Cookery by Mary E. Williams, and Catherine R. Fisher.

In the Course in English, pupils will be required to read College Entrance Requirements, or equivalent classics.

Penmanship and Spelling will be required throughout course.
