The Commissioner Speaks

As Commissioner of the Alabama Department of Agriculture and Industries, I am pleased to present the 1978 edition of "Alabama Agricultural Statistics." This bulletin comes to you through the combined efforts of this department and the Economics, Statistics, and Cooperatives Service of the USDA. It is a comprehensive summary of current data with historical comparisons relating to the Agricultural sector of Alabama's economy. Reliable basic data is essential to the efficient management of business. Farmers are no exception. They and others in agribusiness need current and accurate information if they are to plan their production and marketing programs wisely.

We in the department are especially proud of the part we have had in the orderly and healthy development of agriculture in Alabama over the years. We believe that there is still potential for expansion. This is important because the challenge of the future appears to be whether or not our nation can continue to be the breadbasket of the world as well as supplying our own needs.

This publication typifies the cooperative efforts between the Alabama Department of Agriculture and Industries and the United States Department of Agriculture. Through these cooperative efforts, we avoid duplication of effort while still providing assistance to Alabama's total agricultural community.

Sincerely,

A handwritten signature in cursive script that reads "McMillan Lane". The signature is written in dark ink and is positioned above the printed name.

McMillan Lane
Commissioner

ALABAMA CROP and LIVESTOCK REPORTING SERVICE

McMILLAN LANE
Commissioner of Agriculture

PAUL WALSH
State Statistician

Since this bulletin is the twentieth in a series that dates back to 1948, it seems appropriate that the cover picture is about the poultry industry. This segment of Alabama's agriculture accounts for approximately one-third of the total cash receipts from farm marketings. Over 519 million dollars flowed into Alabama from this source during 1977. Back in 1949, poultry accounted for only 9 percent of total cash receipts. The dramatic upturn was led by broilers with a jump from 8 million dollars in 1949 to 353 million dollars in 1977.

"Alabama Agricultural Statistics" has ranked among the more popular of our releases based on user demand. It is by far the most complete statistical reference available relating to agriculture in Alabama. In general, this issue contains the preliminary series of estimates for 1977 along with the comparable 1976 data. Also included are pertinent historical estimates on the state level and all available 1972-1975 county estimates for comparison purposes.

The accuracy of our estimates is tied closely to the degree of response to our surveys. In Alabama, the response has been gratifying. For this reason, I want to acknowledge the many Alabama farmers and agribusinessmen who assisted us by providing basic data about the state's agriculture. Their reports have been supplemented by those from the County Extension Chairmen. The county income data in particular is the result of assistance given us by the Cooperative Extension Service.

I do want to express my appreciation to the staff of the Alabama Crop and Livestock Reporting Service for their devoted service--the result of which you will see here.

Sincerely,

Paul A. Walsh
Statistician in Charge

CROP REVIEW

1977

by Charles A. VanLahr, Jr.

The value of principal crops produced by Alabama farmers during 1977 totaled \$567.6 million, down 12 percent from the 1976 value of \$642.8 million. Lower corn production resulting from the summer drought was the main factor in the decrease. Lower prices for most commodities also contributed to the decline. Record high productions were recorded for soybeans and peanuts. Production increases were recorded for wheat, oats, and pecans.

Soybeans remained Alabama's most valuable crop with a value of \$193.2 million, 7 percent above 1976. Other crops contributing substantial value were: peanuts \$130.8 million, up 24 percent; cotton lint and seed \$69.9 million, down 44 percent; hay \$55.9 million, up 23 percent; corn for grain \$22.8 million, down 81 percent.

Alabama farmers harvested principal crops from 3.4 million acres, down 3 percent from the 3.5 million acres harvested in 1976. An increase in soybean acreage was more than offset by decreases in corn and cotton acreages.

Rains and wet grounds delayed land preparation and planting of row crops during early spring. Favorable conditions during April and early May allowed farmers to make up lost time and planting of corn and cotton was completed earlier than normal. During mid-May, dry soils began to slow down planting operations and reduce prospects for those crops already planted. Drought conditions began in southern counties and rapidly spread across the State.

The drought continued until late July, when widespread rains improved conditions considerably. The rains were too late to save the corn crop, but most other crops improved during the late summer months. The peanut harvest was nearly two weeks later than normal, but the late harvest produced a record crop. The cotton harvest was well ahead of schedule until late season rains, which lasted well into December, kept some fields from being harvested.

Five leading crops: Acreage, yield, production and value, 1977

Crop	Unit	Acres harvested	Yield per harvested acre	Production	Value of production
		1,000 acres	Unit	1,000 units	1,000 dollars

LIVESTOCK REVIEW

1977

by Robert L. Jefferson

Alabama livestock producers received \$328.3 million from marketings of cattle and calves, hogs and pigs, and sheep and lambs during 1977, 17 percent below the record \$395.7 million received for 1976 marketings, but 36 percent above the \$241.7 million received in 1975. Decreased cattle and calves marketings accounted for most of the decrease from 1976; however, marketing of all meat animal species showed declines. The total value of cattle, hogs, and sheep in Alabama's end-of-year inventory, at \$350.8 million, was 16 percent below the previous year's \$420.0 million, but 34 percent above the \$261.1 million at the end of 1975. The value of cattle and hogs dropped 17 percent and 14 percent respectively.

Cattle Numbers Down 10 Percent: At the beginning of the year, Alabama Cattlemen were holding 2,130,000 cattle and calves, 10 percent below the January 1, 1977, inventory and 25 percent below the same time two years ago. Brood cow numbers decreased from 1,180,000 January 1, 1977, to 1,100,000 January 1, 1978, a 7 percent decline. Heifers for brood cow replacement decreased 24 percent. All other classes of cattle were also at a decline. The value of cattle and calves on Alabama farms on January 1, 1978, totaled \$340.8 million, an average of \$160.00 per head. Alabama ranked 17th among states in total cattle and 14th in number of beef cows that have calved. Alabama's 1977 calf crop, at 1,020,000, was down 30,000 from 1976 and 210,000 below the 1975 record high calf crop.

Hog Inventory Up: All hogs and pigs on Alabama farms totaled 650,000 December 1, 1977, 3 percent above a year earlier. Alabama ranked 17th among states in total hog numbers. Breeding stock was up 7 percent from the previous year and market hogs were up 2 percent from December 1, 1976. The total value of the December 1, 1977 inventory, at \$34.5 million was 20 percent above the December 1, 1976 value. The increase resulted primarily from a \$7.50 rise in value per head.

Farrowings during 1977 totaled 154,000, up 2 percent from the 151,000 farrowings during 1976. The average litter size decreased to 7.0, giving a pig crop of about 1,076,000 for 1977, compared with 1,103,000 in 1976.

Sheep Inventory Up: Some 3,700 sheep were on Alabama farms January 1, 1978, 100 more than a year earlier. Inventory was valued at \$98,000, up \$12,000 from January 1, 1977.

Milk Production Up: A total of 684 million pounds of milk was produced on Alabama farms during 1977, up 2 million from 1976. The average number of milk cows on farms was 85,000 head, 3,000 below 1976. Production per cow rose from 7,750 pounds in 1976 to 8,047 pounds in 1977.

Red Meat Production Increases: Production of red meat (beef, veal, pork, and mutton) in Alabama totaled 233.6 million pounds during 1977, up 8 percent from the 215.4 million pounds produced in 1976. Beef and veal production declined 7 percent while hog production was up 21 percent.

Milk: Production, disposition and income, Alabama, 1975-77

Item	Unit	1975	1976	1977
<u>Production</u> ^{1/}				
Milk cows on farms ^{2/}	1,000 head	91	88	85
Milk per cow	Pounds	7,538	7,750	8,047
Milkfat per cow	Pounds	277	284	293
Percentage milkfat in milk produced	Percent	3.68	3.66	3.64
Total milk production	Mil. lbs.	686	682	684
Total milkfat production	Mil. lbs.	25	25	25
<u>Farm Disposition</u>				
Consumed on farms where produced				
Fed to calves ^{1/}	Mil. lbs.	6	6	5
As fluid milk, cream and butter	Mil. lbs.	26	26	23
Total	Mil. lbs.	32	32	28
Milk marketed by farmers				
Sold to plants and dealers as whole milk	Mil. lbs.	635	630	635
Retailed by farmers as milk and cream	Mil. lbs.	19	20	21
Total	Mil. lbs.	654	650	656
<u>Utilization and Income</u>				
Milk sold to plants and dealers				
Quantity	Mil. lbs.	635	630	635
Price per 100 lb.	Dollars	10.40	10.80	10.90
Cash receipts	1,000 dols.	66,040	68,040	69,215
Milk retailed by farmers				
Quantity	1,000 qts.	8,837	9,302	9,767
Price per quart	Cents	40.0	45.0	35.0
Cash receipts	1,000 dols.	3,535	4,186	3,418
Combined marketings of milk and cream				
Milk utilized	Mil. lbs.	654	650	656
Average returns per 100 pounds of milk ^{3/}	Dollars	10.64	11.11	11.07
Average returns per pound milkfat ^{3/}	Dollars	2.89	3.04	3.04
Cash receipts from marketings	1,000 dols.	69,575	72,226	72,633
Used for milk, cream and butter on farms where produced				
Milk utilized	Mil. lbs.	26	26	23
Value	1,000 dols.	2,766	2,889	2,546
Gross farm income from dairy products ^{4/}	1,000 dols.	72,341	75,115	75,179
Farm value of milk produced ^{5/}	1,000 dols.	72,990	75,770	75,719

^{1/} Excludes milk sucked by calves. ^{2/} Average number on farms during year, excluding heifers not yet fresh. ^{3/} Cash receipts divided by milk or milkfat represented in combined marketings. ^{4/} Cash receipts from marketing of milk and cream plus value of milk used for home consumption. ^{5/} Includes value of milk fed to calves.

Manufactured dairy products: Production of selected items, by months, Alabama, 1976-77

POULTRY REVIEW

1977

by Barbara J. Newman

Alabama's Poultry Industry at the Top: The State's poultry industry leads all other commodities to win the largest share of cash receipts from farm marketings by producers in 1977. Poultry claimed over 34 percent of the total cash receipts with \$519 million total sales of broilers, eggs, and chickens. This is 2 percent above the previous years total of \$508 million. Broiler production consisted of 68 percent of this amount while egg production followed with 30 percent. Production of chickens, excluding broilers, had only minor significance. A small percentage of the commercial table egg production is from independently owned flocks while the majority of production is controlled by large integrated operations. The broiler industry is totally regulated by these integrated firms. Alabama ranked fifth behind Arkansas, Georgia, California and North Carolina, respectively.

Broiler Production Down: The second largest number of broilers, 428.1 million, were marketed in Alabama during 1977. This was off slightly from the record set in 1976 of 430.2 million but 8 percent above the 395.8 million marketed in 1975. Gross income from broilers at \$348 million was down 2 percent from the 1976 total of \$355 million. The price received by the growers at 22.0 cents per pound (liveweight at farm) was down .3 cents from the 1976 price of 22.3 cents. The record high was 25.3 cents in 1975 and the lowest record was set in 1967 when growers received an average of 12.0 cents.

Egg Production Shatters Record: Alabama's laying flock produced 3,183 million eggs during 1977, which is 264 million more than the 2,919 million eggs of the previous year. This surpasses the previous record high of 2,951 million eggs established in 1975. The eggs were either used for hatching eggs or sold in the commercial market, both wholesale and retail. The average number of layers on hand during 1977 was 13.4 million in comparison with 12.3 million and 12.5 million, respectively, in 1976 and 1975. The average number of eggs laid per hen was 237 during 1977. Egg production accounted for \$158.1 million of the poultry cash receipts.

Chick Hatchery Production Up 3 Percent: During the year 479,282,000 chicks were hatched commercially, breaking last year's record high of 464,956,000 chicks. The 1977 hatch is 3 percent above the 1976 total. Broiler-type chicks accounted for 98 percent of the hatch while the remaining 2 percent were egg-type chicks.

Chicken Production (excluding broiler) Declined: Alabama poultrymen produced 13.2 million chickens (excluding broilers) in 1977, down 3 percent from 1976 with 13.7 million. This phase of the poultry industry reflects largely the production of replacement pullets for laying flocks and production in small farm flocks. Cash receipts from the sale of chickens were \$7.3 million, compared with \$7.2 million in 1976.

PRICES AND FARM LABOR REVIEW

1977

by Harry L. Wimbush

Prices Received by Farmers

The Alabama All Commodity Index of Prices Received averaged 446 percent of the 1910-14=100 base in 1977, compared with the 443 percent in 1976. This was 1 percent above 1976 and up 6 percent from the 419 percent in 1975. Higher prices for crops contributed most to the increase.

The Livestock and Livestock Products Index, one of the two components of the All Commodity Index, at 399 percent of base, was down 1 percent from the 1976 average. Beef cattle averaged \$28.40 per cwt., down \$.20 from the \$28.60 in 1976. The average price for calves was \$32.10 per cwt., \$.90 higher than 1976.

Hogs, at \$38.30 per cwt., were down \$5.50 from 1976. Milk sold wholesale by farmers averaged \$10.90 per cwt., in 1977, up 10 cents from the previous year. Broiler prices, at 22.0 cents per pound, were down slightly from 1976. Eggs, at 60.6 cents per dozen, were 1.5 cents less than 1976.

The Crops Index, the other component of the All Commodity Index, was 546 percent of base in 1977, up 22 points (4 percent) from the 1976 average. Potatoes averaged \$9.23 per cwt., in 1977, compared with \$7.87 the year earlier, and \$8.34 in 1975. Cotton averaged 47.1 cents per pound, 19.3 cents more than the previous year's average of 66.4. Soybeans, at \$5.75 per bushel, fell \$1.30 from 1976. Hay, at \$55.50 per ton, was up \$14.50 from a year earlier. Wheat averaged \$2.05 per bushel, \$1.15 less than 1976. The price of corn, at \$2.10 per bushel, dropped 45 cents from the previous year.

Prices Paid by Farmers

Alabama does not have an Index of Prices Paid by Farmers. Therefore, direct comparisons between prices paid and those received by Alabama farmers cannot be made. However, many of the cost of production items increased from a year ago.

Farmers in the state paid an average of \$170.00 per ton for chick starter in 1977, compared with \$172.00 in 1976 and \$157.00 in 1975. Broiler grower sold for \$141.00 per ton in 1977, compared with \$163.00 in 1976 and \$158.00 in 1975. Farmers paid \$150.00 per ton for laying feed, compared with \$155.00 in 1976 and \$147.00 in 1975. Soybean meal, 44 percent protein, sold for \$11.00 per cwt., down from the \$11.50 paid in 1976. Farmers paid an average of \$8.20 per cwt. for 14-18 percent hog feed, compared with \$8.70 in 1976 and \$7.90 in 1975.

Farm Employment and Wage Rates

Beginning in 1973, Alabama labor statistics were derived from a probability farm labor survey conducted during the week that includes the twelfth of January, April, July, and October of each year. The data from this survey was supplied by individual farmers and employers of agricultural related firms who had farm laborers. During 1977, the annual average number of workers at 86,000 declined 9 percent from the previous year's average of 94,000. Family workers declined 69,000 to 63,000 in 1977 as hired workers dropped off 25,000 to 23,000. April and July were the quarters with the greatest activity. Wage rates have increased significantly throughout the years as a result of the increasing required minimum wage rate as set up in the amended Fair Labor Standards Act of 1938. The wage for farm workers for all methods of pay converted to an hourly rate averaged \$2.56 in January 1977, up 11 cents over the previous year 33 cents over January 1975.

FARM INCOME REVIEW

1977

by David C. Bellis

Cash receipts from farm marketings in Alabama dropped 8 percent in 1977 from last year's \$1.6 billion to \$1.5 billion, but up 12 percent over 1975's cash receipts of \$1.3 billion. Livestock and livestock products, valued at \$927 million, accounted for 62 percent of the total, while crops totaled \$569 million to make up the remaining 38 percent.

Alabama poultry and poultry products accounted for 34.7 percent of the state's total receipts from farm marketings with cattle and calves ranking second with 16.8 percent of the total receipts. Soybeans accounted for 10.3 percent of the total while peanuts moved back up to fourth place with 8.8 percent of the total. Cotton lint and cottonseed dropped to fifth place accounting for only 5.6 percent of the total. Hogs and dairy products took sixth and seventh places among the rankings with 5.2 percent and 4.9 percent respectively. Sales from these seven enterprises made up 86.3 percent of the total cash receipts from farm marketings in Alabama.

Receipts from the state's broilers, eggs, and farm chickens totaled \$518.9 million in 1977, up \$10.7 million from the 1976 total of \$508.2 million. Cattle and calf returns totaled \$250.9 million, down \$56.0 million from the previous year. Receipts from soybeans, peanuts and cotton lint and cottonseed accounted for 65.0 percent of the total crop receipts. Combined returns from these three crops were down 14.0 percent from 1976.

FARM INCOME CONCEPTS

Cash receipts from farm marketings represent gross income from the sales of crops, livestock, and poultry during the calendar year. The value of home consumption of farm products, interfarm sales of livestock, and crops fed on farms where grown are not included as cash receipts. Production expenses such as feed, fuel, fertilizer, and marketing costs are not subtracted from gross cash receipts. County estimates of cash receipts reflect farm productivity of the county to which the income is assigned. For example, income from crops is credited to the producing county even though the crops may be stored, processed and marketed in another county.

Cash receipts from marketings of crops is the final product of several estimates: acreage, yield, percentage of total production sold, average price, and changes in inventories. For field crops, such as corn, hay, cotton, and soybeans, where the crop is harvested during one calendar year and portions are sold the next calendar year, cash receipts are not to be compared with crop year value of sales. Calendar year cash receipts from such crops represent sales of parts of production from two or more crop years. For crops where all or nearly all the production is harvested and marketed within a single calendar year, such as peanuts, the cash receipts are essentially the same as the value of production.

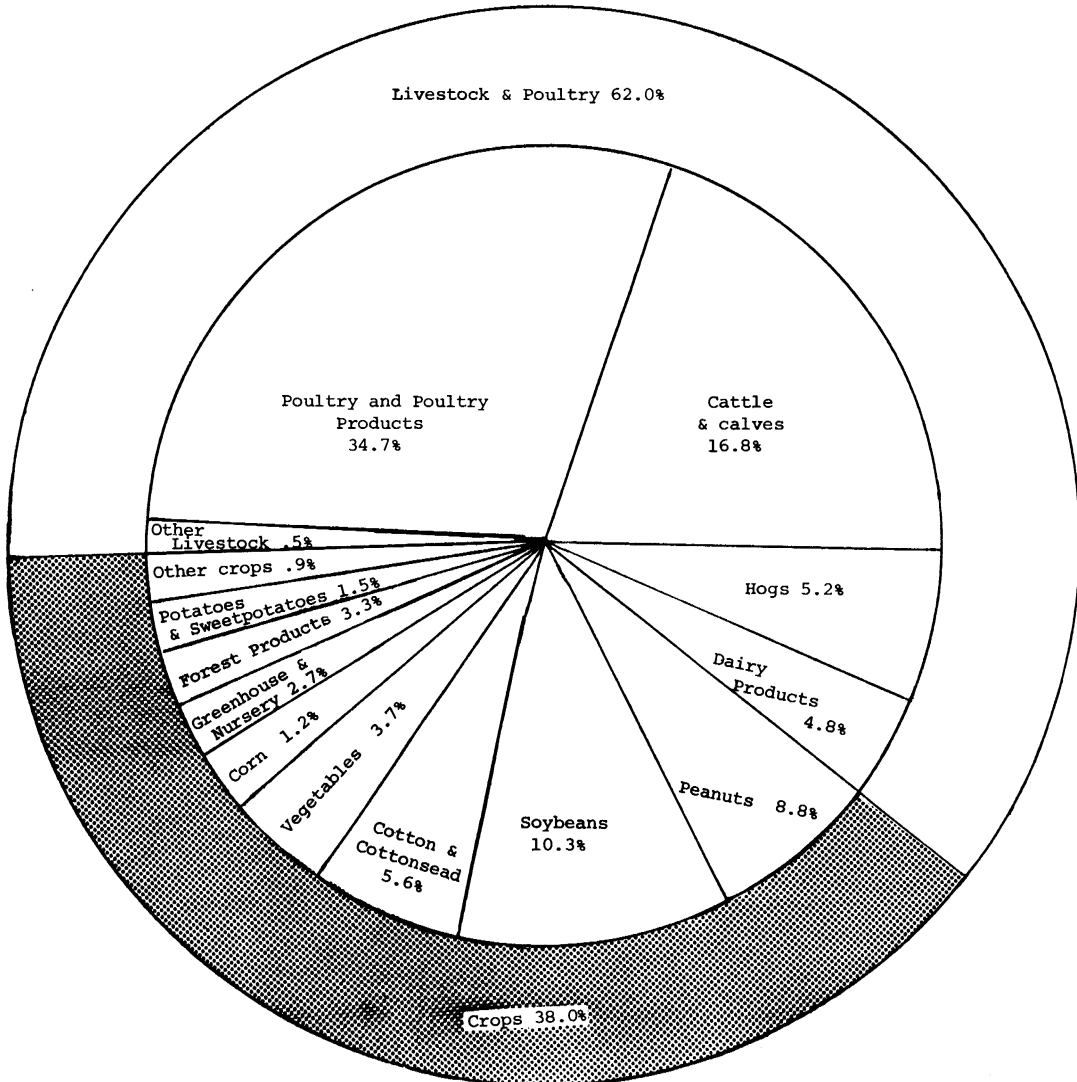

The annual cash receipts from farm marketings of livestock and poultry also refer to the calendar year. Receipts include the sales value of an animal only once, usually the calf at the time it is sold for slaughter or final disposition. These income data do not exactly represent the summation of all income received from livestock and poultry producers in a given county. For example, feeder pigs or cattle sold from one farm to another within a county are included only upon final disposition. Also, where commodities, such as broilers, are produced under contract, the grower may directly receive only a contract payment. However, these data include the full value at the farm level of the broilers sold.

Cash receipts from farm marketings, by commodities, Alabama, 1975-1977

Reports Issued by the Alabama Crop and Livestock Reporting Service

The Alabama Crop and Livestock Reporting Service publishes official estimates of crop and livestock production, prices received and paid by farmers and various other special reports. Listed below are a few of the more important reports which may be obtained by writing to:

Agricultural Statistician
P. O. Box 1071
Montgomery, Alabama 36102

-
- () 100 General Crops and Crop Values - - Estimates of acreage, yield and production of major crops --monthly. Crop values--annually. Pecans and peaches--during season.
 - () 110 Weekly Crop and Weather - - Summary of crop conditions, weather etc.--weekly.
 - () 120 Cotton - - Acreage, yield and production by district--semi-annually.
 - () 130 Grain Stocks - - Estimates of stocks of grain in all positions--quarterly.
 - () 139 White Corn - - Acreage, yield and production--semi-annually.
 - () 199 Crop County Estimates - - Estimates by counties for corn, cotton, hay, peanuts, sorghum grain, soybeans and wheat.
 - () 301 Potatoes - - Acreage, yield and production--monthly during season.
 - () 330 Commercial Vegetables - - Acreage and production--periodically.
 - () 400 Cattle - - Cattle inventory and calf crop--semi-annually.
 - () 412 Sheep - - Sheep inventory, lamb crop and wool production--annually.
 - () 420 Hogs - - Hog inventory, pig crop, farrowings and farrowing intentions--semi-annually.
 - () 461 Bees and Honey - - Honey and beeswax production and prices--annually.
 - () 470 Commercial Slaughter - - Commercial production of red meat--monthly.
 - () 499 Livestock County Estimates - - Cattle and hog inventories--annually.
 - () 500 Dairy and Manufactured Dairy Products - - Milk cows and milk production--monthly. Estimates of manufactured dairy products--annually.
 - () 604 Weekly Broiler - - Eggs set and broilers placed--weekly.
 - () 654 Poultry Report - - Commercial hatchery production, pullets placed for broiler hatchery supply flocks, layer numbers and egg production--monthly. Chicken inventory, chickens raised and special commercial poultry survey--annually.
 - () 699 Poultry County Estimates - - Inventory--annually.
 - () 700 Prices - - Prices received by farmers, prices paid for feed, price indexes and ratios--monthly.
 - () 701 Farm Income - - Cash receipts from farming, farm expenses and value of products consumed on farms--semi-annually.
 - () 709 Farm Labor - - Number of workers and wage rates--quarterly.
 - () 799 Cash Receipts County Estimates - - Crop and livestock marketings--annual bulletin.
 - () 900 Alabama Agricultural Statistics - - annual bulletin.

WHY CROP AND LIVESTOCK REPORTS

- A man's judgment is no better than his facts and crop and livestock reports are the basic facts of agriculture.
- They aid farmers in planning their production and marketing and provide them with an orderly market.
- They are the basis for analysis of agriculture and other business conditions.
- They enable railroads to make better distribution of cars for moving farm products.
- They give producers the same foresight to future price trends that organized dealers possess.
- They are a check on fluctuation in price by removing uncertainty of supply.
- They are the best basis for adjusting supply to demand which is highly essential if maximum price is to prevail.
- They aid farm organizations, schools, and others in planning constructive programs.
- They give information on surplus and deficit areas of production making possible a more economical distribution of products.
- They are a guide to farm resources and for developing new resources such as irrigation, electric power, location of food processing and other factories.
- They reduce uncertainty which limits speculation in farm products. Speculation adds to the cost of marketing.
- They indicate potential buying power enabling manufactures to meet the probable demand.
- They provide an accurate, reliable, unbiased picture of Alabama's agriculture and furnish a sound basis for judgment and action by farmers, other individuals, businessmen, transportation agencies, crop and livestock interests, and governmental agencies.
