The National Association of State Departments of Agriculture (NASDA) is a nonprofit, nonpolitical organization comprised of the 50 State Departments of Agriculture. NASDA and USDA-NASS have a cooperative agreement for NASDA to employ enumerators in the collection of agricultural statistics. Without the help of the enumerators, the presentation of statistics in this bulletin would not be possible. The Alabama Agricultural Statistics Service gratefully acknowledges the work and integrity of its NASDA enumerators.

The Alabama Department of Agriculture and Industries, working in cooperation with the Alabama Agricultural Statistics Service, USDA, is proud to present the 44<sup>th</sup> edition of *Alabama Agricultural Statistics*. The numbers contained in this publication are a testimony to the importance of agriculture in the State of Alabama. Farm and forestry receipts reached a record \$4.8 billion in 2001 at the farm gate, with a much greater total economic impact to the State's economy after considering the many jobs created beyond the farm. Alabama ranks 23<sup>rd</sup> in the nation in farm cash receipts in spite of depressed farm prices for many of the commodities we produce. Farmers must contend not only with weather uncertainties to produce and market their products, but many other events out of their control such as trade disputes, global supplies, the rising costs of inputs, and unfortunately tragic events such as the attacks on September 11, 2001. Despite these challenges, the Department of Agriculture and Industries will continue to partner with farmers, agribusinesses, research institutions, other government agencies and our elected leaders to continue to move the State's number one industry forward.

In this issue, we pay special recognition to one of our most diverse sectors in agriculture, the greenhouse, nursery, and sod industries. The beauty we all enjoy from seeing colorful landscapes surrounding homes, businesses, and entire communities begins with the producer. Countless nurseries, greenhouse operations, and sod farms growing a variety of plants, flowers, shrubs, trees, and lawn grasses can be found across the entire State. Many don't realize this industry ranks 4<sup>th</sup> in Alabama farm gate receipts totaling over \$221 million in 2001, with many of the products shipped nationwide and across the globe. This segment of Alabama agriculture will continue to play a key role in our successful industry.

Charles Bishop  
Commissioner

I would like to thank Alabama farmers for their tireless cooperation with the Alabama Agricultural Statistics Service to produce this bulletin. The numbers contained in this summary are possible only by having timely and accurate reports on our surveys from producers and agribusinesses. Our job is to measure, or count, agriculture for the state of Alabama and the nation. Following a quick review of these pages, there is no doubt that *Alabama Agriculture Counts!*

My appreciation is also extended to our corps of enumerators who collect the data and are our ambassadors with our respondents. And a special thanks to the staff of the Alabama Agricultural Statistics Service for their dedication and efforts to put the bulletin together.

Herb Vanderberry  
State Statistician

1/ A farm is defined as any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year.

## 2002 Census of Agriculture

**You Make It Known - Agriculture Counts!**

- ✓ **Census report forms will be mailed in late December, and are due from each farmer and rancher by February 3, 2003.**
- ✓ **U.S. law, Title 7, U.S. Code, requires a response from all who receive a census report form even if they did not operate a farm or ranch in 2002. Farmers and ranchers are guaranteed by law, that their information is kept confidential.**
- ✓ **Only America's Farmers and Ranchers can supply the answers needed to produce an accurate and useful picture of our Nation's agriculture.**

The 2001 crop year for Alabama farmers was a year of excellent yields. Favorable weather conditions throughout the growing season and adequate to surplus moisture helped produce such yields. Land preparation got off to a slow start but soon moved ahead of schedule as weather permitted. This delay caused some farmers to plant late, but most acreage was planted about on schedule. Alabama **corn** growers planted a record low 180,000 acres, with 150,000 acres harvested for grain. Even so, they were pleased with **a record yield of 107 bushels per acre**, 4 bushels above the previous record set in 1999. There were 610,000 acres planted to cotton and 605,000 acres were harvested. Good to excellent weather brought about a yield of 730 pounds of lint per acre. This rendered production of 920,000 bales, the highest outturn since 1955. **Peanut production** was 532.3 million pounds, the largest crop since 1992. Yield was 2,675 pounds per acre, nearly double the previous year's drought-reduced yield and the largest since 1985. Soybean fields remained in mostly good to excellent condition throughout the growing season. Planting lagged behind schedule in some areas due to excessive rainfall, but by midsummer plant growth began to accelerate. A record **soybean yield** of 35 bushels per acre was realized, one bushel above the record set in 1996. Total production of 4,725,000 bushels was harvested from 135,000 acres, the **lowest acreage on record**. **Hay** was harvested from 920,000 acres, highest since 1948. Hay yield per acre, at 2.6 tons, was just 0.1 ton shy of the record established in 1994. The 2001 wheat crop yielded 48 bushels per acre from 70,000 acres, a total of 3,360,000 bushels. **Irish potato** growers had to deal with excessive rains and a shortage of marketing outlets. They only planted 4,200 acres compared with 5,100 the previous year. Yield was 160 cwt. per acre, down 10 cwt. from a year earlier. On the other hand, sweet potato growers had a good year with a state yield of 170 cwt. per acre, up 25 cwt. from last year. This placed production at 493,000 cwt. from 2,900 acres harvested. **Peach production** was 22 million pounds. **Pecan production** was 15 million pounds unchanged from crop year 2000. Production was down rather sharply in Baldwin County and Mobile County.

A LOOK AT ALABAMA CATFISH PRODUCTION AND PRICES - THE PAST DECADE

Alabama producers marketed an ever increasing amount of **foodsize catfish** during the 10-year period beginning in 1992. Sales more than doubled during this time, going from 52.6 million pounds sold in 1992 to 115.0 million pounds 10 years later.

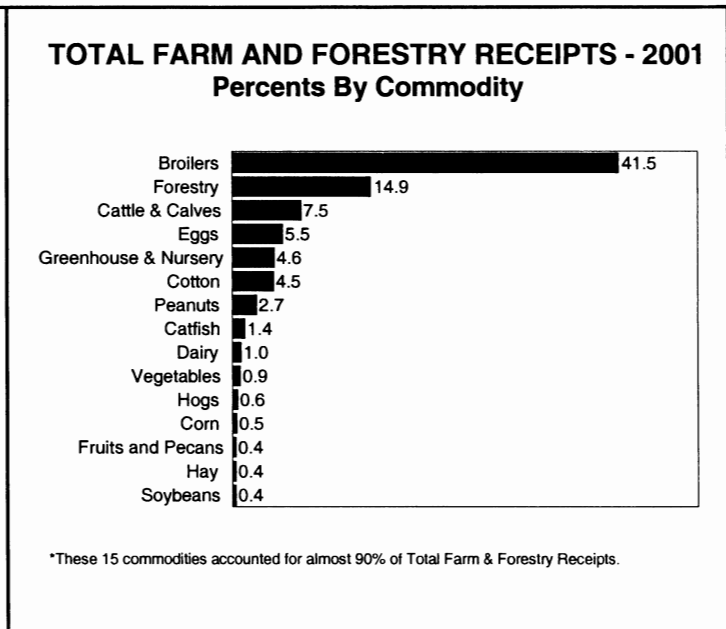

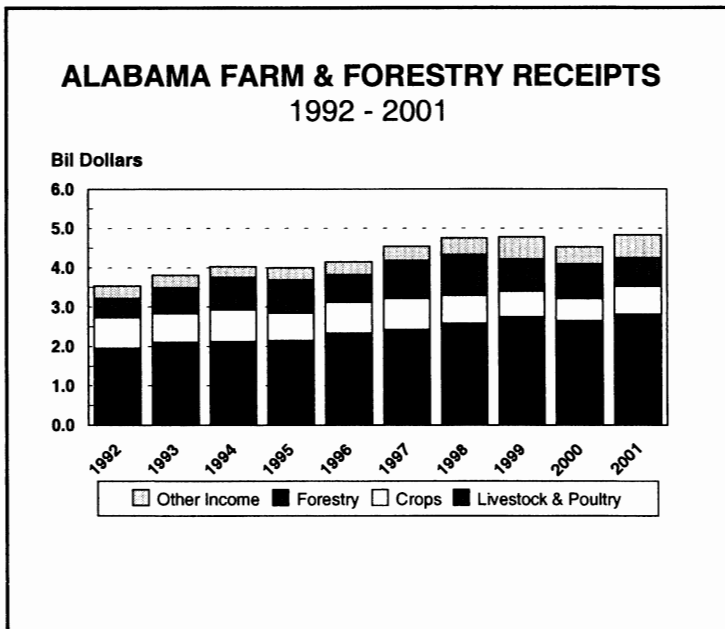

Unfortunately, the same cannot be said about prices growers received for their fish. The yearly average price received for foodsize fish in 1992 was 58 cents per pound. Average price jumped 10 cents in 1993 and another six cents the following year (1994). Prices held steady in the high 60's to low 70's range through 2000. Then in 2001, price fell back to just one penny higher (59 cents) than at start of the decade in 1992.

**Total Farm Receipts** for 2001 totaled \$4.25 billion, a gain of about \$430 million (11 percent) from the previous year. These receipts included returns for livestock and poultry, crops, government agricultural payments, farm forest products, and other farm related income. **Farm and Forestry Receipts** climbed to a record-high \$4.83 billion compared with \$4.52 billion in 2000 and the previous record of \$4.78 billion in 1999.

Receipts for All Agricultural Commodities included \$2.81 billion for **Livestock and Poultry** and \$705.2 million for **Crops**. Higher returns were realized for broiler chickens, eggs, dairy and most crop commodities, including greenhouse, sod and nursery products, while receipts for cattle and calves, hogs and catfish were off rather sharply from a year earlier.

**Broiler Chickens** continued to lead the way as Alabama's # 1 agricultural commodity with receipts of \$2.00 billion, a record-high amount. These receipts compared with \$1.75 billion the previous year and accounted for 41 percent of Total Farm and Forestry Receipts. **Cattle and Calves** contributed \$362.8 million in sales, down 17 percent from a year earlier. Receipts for **Eggs** amounted to \$265.4 million compared with \$259.6 million in 2000. **Greenhouse, Sod and Nursery** returned \$221.1 million, while Alabama **Cotton** farmers racked up \$217.2 million in receipts. Together, these five commodities accounted for nearly 65 percent of Total Farm and Forestry Receipts.

For **counties with limited production** of a specific commodity, cash receipts (starting on page 46) for that commodity are not published, but are included in the county's Total Farm Receipts. *USDA's Farm Service Agency (FSA)* supplied information on **government payments** and stumpage revenue for **farm forest products and non-farm commercial timber** was provided by the *Alabama Forestry Commission*. **Other farm income** includes money received for machine hire and custom work, custom feeding fees, and other farm business-related income. These receipts are not published separately but are included in each county's total farm receipts.
