Alabama Agricultural Statistics
BULLETIN 49

2007 Census of Agriculture Coming Soon!!

America's farmers and ranchers will soon have the opportunity to make their voices heard and help shape the future of agriculture for years to come.

That opportunity will come to their mailboxes in the form of the 2007 Census of Agriculture.

Conducted every five years by the U.S. Department of Agriculture, the Census is a complete count of the nation's farms and ranches and the people who operate them. The Census looks at land use and ownership, operator characteristics, production practices, income and expenditures and other topics. It provides the only source of uniform, comprehensive agricultural data for every county in the nation.

NASS will mail out Census forms on December 28, 2007 to collect data for the 2007 calendar year. Completed forms are due by February 4, 2008. Producers can return their forms by mail or, for the first time, they have the convenient option of filling out the Census online via a secure web site.

For more information about the 2007 Census of Agriculture, please contact the NASS Alabama Field Office at 334-279-3555 or visit www.agcensus.usda.gov online.

YOUR VOICE. YOUR FUTURE. YOUR RESPONSIBILITY.

BIO-FUELS WEBSITES

Additional information about bio-fuels can be found at the Alabama Department of Agriculture and Industries alternative fuels website: www.agi.alabama.gov/alternative_fuels

Alabama Clean Fuels Coalition, www.alabamacleanfuels.org -ACFC is focused on bringing Alternative Fuels and Alternative Fuel Vehicles to towns and cities in Alabama by increasing the availability of those fuels and the use of vehicles powered by alternative fuels in Alabama.

Alternative Fuels Data Center, www.eere.energy.gov/afdc - Centralized information resource alternative fuel and vehicle information needs.

National Biodiesel Board, www.biodiesel.org - The NBB is a national trade association for the biodiesel industry as the coordinating body for research and development in the US.

Tax Incentives Assistance Project, www.energytaxincentives.org - TIAP was developed to give consumers and businesses the information needed to make use of the federal income tax incentives for energy efficient products and technologies.

The attractive cover design and composition was provided by the Alabama Farmer's Federation. A special thanks to Jeff Helms and Mike Moody for their creativity in highlighting Alabama's specialty crops. The Bulletin is available on our website: <http://www.nass.usda.gov/al>

---------------------------------	-------

We are facing some serious challenges in this country regarding energy consumption, and it seems that the only viable alternative is changing the way we make and use our fuel. Bio-fuels represent an exciting new dimension to agriculture in Alabama. We have an abundance of resources normally associated with alternative fuels such as corn and soybeans, but we also have cellulosic products such as wood and switchgrass. And, in Montgomery, we will soon begin using recycled cooking oil to fuel city and state vehicles.

The Alabama Legislature created the Center of Alternative Fuels in the 2007 Session. The Center, housed in the Department of Agriculture and Industries, shows how important the development of alternative and bio-fuels is to our state. And, with the new law, state taxpayers will have an opportunity to contribute to the Alabama Alternative Fuels Research and Development Fund when they file their 2007 income tax form.

As citizens, one of the most patriotic actions we can take is to develop and use alternative sources of fuel to lessen our dependence on foreign oil. Agriculture must be a big part of the solution. In fact, this could be the biggest revolution for agriculture in this country since farms were mechanized. For more information visit:

Ron Sparks
Commissioner

As the new director for the Alabama Field Office, USDA/NASS, I have truly enjoyed getting to know Alabama agriculture. Poultry, cotton, peanuts, and catfish not only make a huge economic impact locally, but make a difference at the national level as well. There is also the potential for Alabama to be a viable participant in the exploration of bio-fuel use. The *Alabama Agricultural Statistics Bulletin* provides a comprehensive statistical reference to these and other agricultural commodities on an annual basis.

The success of this bulletin is due in large part to the many farmers who willingly took time from their busy schedules to participate in our surveys and I thank them for their cooperation.

I also want to thank our telephone and field enumerators who work hard to maintain a positive association with Alabama producers and the office staff who've put together another excellent statistical bulletin.

Bill Weaver
Director

(L-R) Dr. Ernst Cebert, an agronomist with A&M University, Hoover Mayor Tony Petelos, and Commissioner Ron Sparks at the biodiesel facility in Hoover.

State Highlights for 2006-2007:

- Total farm and forestry receipts were over \$5.29 billion for the year.
- Cash receipts from farm commodities totaled \$3.74 billion, versus \$4.17 billion the previous year.
- The top five farm commodities for cash receipts were: (1) poultry, (2) cattle and calves, (3) greenhouse, sod, and nursery products, (4) cotton and (5) catfish. Together they make up 91 percent of the total commodity receipts.
- Livestock and poultry accounted for 81% of the cash receipts and crops the other 19%.
- Poultry made up 65 percent of the total cash receipts for all commodities (excluding forestry).
- Alabama ranked 3rd in broiler production with marketings of 1.05 billion birds.
- Greenhouse, sod, and nursery receipts totaled \$290.6 million ranking Alabama 16th in the nation.
- Laying flocks produced 2.00 billion eggs to rank 14th in egg production.
- Cattle inventory on January 1, 2007 was 1.32 million head and the state ranked 26th nationally.
- Catfish sales amounted to \$99.0 million. Alabama ranked second behind Mississippi in sales.
- Principal acreages for crops were: cotton (575,000), corn (200,000), peanuts (165,000), soybeans (160,000), and wheat (100,000).
- Alabama ranked 3rd in peanuts and 10th in cotton production.
- The state was 7th in pecan production and 15th in peach.
- Alabama ranked 2nd in commercial forest land, with 22.6 million acres.

A prolonged year of drought and hot weather conditions in 2006 resulted in low yields for the major row crops and hay. As a result **hay stocks** decreased to 264,000 tons, down 92,000 tons from 2005. Hay yield decreased to 2.0 tons per acre, down from 2.7 tons in 2005. Cattle growers and other livestock producers continue to feel the impact of the hay shortage. **Hay production** came in at 1.44 million tons from 720,000 harvested acres, the lowest production level since year 2000. **Corn** yields averaged 47 bushels below last year's 119 bushels per acre, and was 51 bushels below the record year set in 2004. This was the lowest yield and production since 2000. Corn production decreased 50 percent from last year. Several crops yielded better than expected, one being the **peanut** crop yield which varied from field to field. Despite suffering from hot weather and infrequent scattered showers, the peanut crop produced a yield of 2,500 pounds per acre, down 250 pounds from last year. Production came in at 407.5 million pounds, down from 613.2 million pounds last year. **Cotton** production is estimated at 675,000 bales from 560,000 harvested acres. Cotton yield and quality varied greatly because of the early and late planted crop across the state. Alabama's yield is set at 579 lint pounds per acre, down 168 pounds from 2005. This yield is 216 pounds below the record set in 1985. **Soybean** yield is 20 bushels per acre, down 13 bushels from 2005 and 16 bushels below the record set in 2003. Soybean producers experienced some insect pressure and very little Asian Rust this year. Production of soybeans is 3.0 million bushels compared to 4.8 million bushels in 2005. Irish potato growers yielded 150 cwt., same as last year. Surprisingly, **sweet potato** yields increased slightly which was set at 160 cwt., compared to 150 cwt., in 2005 from 2,300 harvested acres. Alabama's **wheat** seedings for 2007 was set at 120,000 acres, up 20,000 acres from 2006.

1/ Marketing year average prices are weighted prices for commodities sold during the marketing year. They represent average prices received by farmers at point of first sale for all grades and qualities. 2/ Estimates are for market eggs only. 3/ Unit change in 2003 from ct/lb to \$/ton.

Cash Receipts Review 2006

Total Farm Receipts for 2006 totaled \$4.44 billion, a decrease of \$375 million (8 percent) from the previous year. These receipts included returns for livestock and poultry, crops, government agricultural payments, farm forest products, and other farm related income. **Total Farm and Forestry Receipts** were \$5.29 billion compared with \$5.55 billion in 2005.

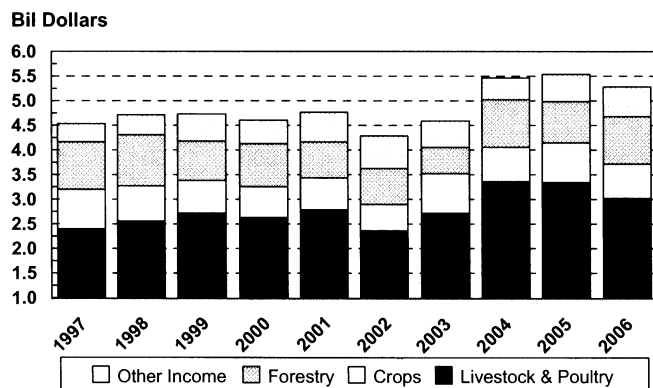

Receipts for All Agricultural Commodities included \$3.04 billion for Livestock and Poultry and \$695.9 million for crops. Higher returns were realized for catfish and greenhouse & nursery commodities, while receipts for cattle, hogs, dairy, broilers, eggs, and most crop commodities were down from previous year.

Broiler Chickens continued to lead the way as Alabama's # 1 agricultural commodity with receipts of \$2.16 billion. These receipts were down 10 percent from the previous year and accounted for nearly 41 percent of Total Farm and Forestry Receipts. **Cattle and Calves** contributed \$399.5 million in sales, down 13 percent from a year earlier. Receipts for **Eggs** amounted to \$274.5 million compared with \$281.6 million in 2005. **Greenhouse, Sod and Nursery** returned \$290.6 million, while **Cotton** was down 29 percent to \$1.8 million in receipts. Together, these five commodities accounted for 60 percent of Total Farm and Forestry Receipts.

The 2002 Census of Agriculture was taken to obtain Agricultural Statistics for Alabama and each county in the state, as well as every county and state in the Nation. The 2002 Census introduced new methodology to account for all farms. All Census items published for 2002 were adjusted for undercoverage. To provide comparable data, 1997 Census data were also adjusted.

The Census data provided in this bulletin (pp 94-96) represent only a small portion of the total information collected and published in the 2002 Census of Agriculture. Log onto our website (<http://www.usda.gov/nass/>) and click on "Agriculture Census" to see all the census numbers for the U.S. and each state, including Alabama.

The KidFit program was conceived in 2006 to help Alabama's children with the growing problem of obesity due to poor diet and exercise habits. The program targets children in elementary school before too many bad habits have a chance to develop. This program will have a tremendous impact on awareness of nutrition and fitness issues and will help lay a foundation for better health for children in Alabama.

Recent studies indicate that 1 out of every 4 children in Alabama is dangerously overweight as compared to 1 out of every 10 nationally. The focus of the KidFit program is to teach children how to make better decisions about fitness and nutrition. It also seeks the active involvement of parents to reinforce and support healthier choices.

The KidFit program was made possible with the support of the Alabama Power Foundation, the Alabama State Board of Education and State Superintendent of Education Dr. Joe Morton. For more information, please visit: <http://www.kidfitamerica.com>
