SUPPLY and UTILIZATION of GRADE A MILK in ALABAMA  
1954 through 1962 \*

Lowell E. Wilson  
Assistant Professor of Agricultural Economics \*\*

This report contains a compilation of statistical and related information dealing with the marketing of Grade A milk in Alabama. It is a revision and expansion of a report entitled MARKETING of MILK in ALABAMA, published in December, 1960. <sup>1/</sup> This revised report presents marketing data covering the period from 1954 through 1962, whereas the earlier report covered the period 1958 through 1960. The purpose is to bring together available information relating to the fluid milk industry in Alabama and to present this information in a usable form for the dairy industry and other interested groups.

The data presented in this report were compiled largely from orders, rules, regulations, and other reports released by the Alabama Milk Control Board. Information regarding supplementary imports of milk was obtained from the Alabama Department of Public Health. Data showing deliveries of Alabama produced milk sold in the Chattanooga, Tennessee

---

\* The Experiment Station project on which this report is based was supported by funds provided by the Research and Marketing Act of 1946 and by State Research funds. The overall study was carried out as part of Alabama Research Project 583, a contributing study to the Southern Regional Dairy Marketing Project SM-10 (Revised), "Establishing Guides for Efficient Organization of the Dairy Industry Under Changing Conditions in the South".

\*\* The author expresses appreciation to the people who aided in the preparation of the material in this report. Employees of the Alabama Milk Control Board cooperated in supplying information used in this report.

<sup>1/</sup> Wilson, Lowell E., MARKETING of MILK in ALABAMA, Department of Agricultural Economics, Alabama Agricultural Experiment Station, December, 1960.

Federal Milk Order were obtained from the Office of Chattanooga Milk Market Administrator.

The fluid milk industry in Alabama is almost entirely under the supervision of the Alabama Milk Control Board. Currently, all Grade A milk delivered by Alabama producers to fluid milk plants located in the State is regulated by the Board. A relatively small volume of Grade A milk produced in Alabama counties along adjoining state lines is shipped to out-of-state handlers. Part of the volume of exports of Alabama produced Grade A milk is given in Table 55.

#### Regulated Milk Sheds

Although milk sold for fluid use in many State markets has been under supervision of the Board since the late 1930's, it has been only in recent years that the authority of the Board has been extended to cover most of the State. From the establishment of milk sheds in 1939 to the early 1950's, regulated milk sheds were defined to include small areas. The Mobile Milk Shed, for example, was defined to include a territory within a radius of 10 miles of the Courthouse of Mobile County. The 15 milk sheds in effect during June, 1952, are shown in Figure No. 1. At that time regulated milk sheds were limited in designated towns and the nearby area. The Birmingham Milk Shed, however, included all of Jefferson County.

Because of changing marketing conditions, the Milk Control Board subsequently expanded regulated market areas generally along county lines and included larger areas in most sheds. By March 1, 1954, the authority of the Board had been extended to 53 counties and the number of milk sheds reduced to 6, Figure No. 2. September 1, 1961, when the Northwest Alabama Milk Shed came under supervision and regulation of

the Board, the fluid milk industry in the entire State became regulated for the first time. In November, 1961, the number of milk sheds was reduced to 3.

All of the changes and the effective dates of the changes in milk sheds from March 1, 1954, to November 16, 1961, (date of last change in sheds) are shown in Figures No. 2 through 6.

#### Market Classes and Prices

Grade A milk in Alabama is purchased under a classified pricing plan. For many years producers were paid on the basis of two class uses, Classes I and II. A Class I price was established for milk used in fluid consumption including cream products, and a Class II or lower price class was established for surplus milk.

Since 1954, the Alabama Milk Control Board has made several changes in the number and definition of class uses. Until September, 1956, milk utilized in most fluid products was purchased at the Class I price. After public hearings were held by the Board in August, 1956, a new Class II was defined and surplus was redefined as Class III. Whole milk utilized in buttermilk and chocolate milk became Class II. In December, 1956, the number of use classifications was increased to 4. Class I was unchanged; milk used in chocolate milk became Class II; milk used in buttermilk was changed to Class III; and surplus was Class IV.

Producers were paid on the basis of 4 class uses from December 16, 1956 to October 31, 1959. Effective November 1, 1959, chocolate milk was reclassified into Class I and the number of classes reduced to 3. The last change in class definition was effective in September, 1961. Class II was redefined to include skim milk products, chocolate

or flavored drinks (formerly in Class I), and buttermilk.

During the period covered by this report, the Board has issued orders regulating the sale of milk under contract to the United States Government. Until November, 1959, producers were paid the Class I price for this milk for all months except April, May, and June. During these 3 months, the producer price was the surplus price plus \$1.50 per hundred pounds of milk testing 4 per cent butterfat. A pricing order effective November 1, 1959, provided that producers receive a minimum price of \$4.15 for government contract milk throughout the year.

Standing Order NS-3, effective November 1, 1959, provided that a distributor and one or more of his producers may agree to dispose of milk, which would otherwise be surplus, as government contract milk. The distributor and the producer each must agree to receive 50 per cent of the sale price of the government contract milk. However, the producer's share will be no less than the minimum amount allowed in the pricing orders (\$4.15). Thus, it is possible for a producer to receive over 50 per cent of the contract price.

Milk sold in bulk by one plant to another is referred to as an interplant transfer. The Board issued an order effective November 1, 1959, regulating the price to be paid producers of milk handled in this manner. The selling plant received a commission of 15 per cent of the price and the producer 85 per cent, providing the producer's share was not less than the surplus price. Effective September 1, 1961, the producer share was increased to 90 per cent of the selling price. Definition of class uses, including government contract milk and interplant transfers, and changes in definition from January, 1954, to

December, 1962, are shown on pages 14 to 20.

Minimum producer prices effective throughout the period reported are shown by pay period, class use, and market area in Tables 1 through 9. Orders of the Board from which these prices were obtained are shown in footnotes below each table. Until November 1, 1959, the Class I price paid producers varied among regulated milk sheds. For that reason, Class I prices are given by milk sheds. Minimum prices set by the Board for lower class uses were the same in all sheds.

Minimum prices to be paid producers for government contract milk are given in Table 10. These prices are effective in all regulated milk sheds.

The butterfat differential effective in each pay period from January, 1954, to December, 1962, is given in Table 11.

#### Explanation of Statistical Tables

Each month the Office of the Alabama Milk Control Board releases a report showing supplies and utilization of Grade A milk received by handlers licensed by the Board. This monthly report provided the basis for development of the statistical tables presented herein, Tables 12 through 54. Data reported in the tables are given as totals for all regulated handlers and not by milk shed. As several additional market areas have become regulated by the Board since 1954, care should be taken in comparing supplies and use of milk for different time periods.

Tables 12 through 20 give supplies purchased from producer licensees and imported supplies. A number of handlers regularly receive milk from out-of-state producers. This volume is referred to as imported milk. Most imported milk is produced in Mississippi and

Tennessee. During periods of inadequate supplies, it has been necessary for handlers to obtain supplementary imports. During 1957 and 1958, several million pounds of supplementary imports were purchased by licensed handlers. Since 1958 the volume of supplementary imports has been smaller. According to data provided by the Alabama Department of Public Health, a total of 68 tank loads of supplementary milk supplies was brought into the State during 1959, 30 during 1960, one during 1961 and 14 during 1962.

Tables 21 through 29 list the class utilization of all milk received by licensed handlers. Utilization of Alabama produced supplies is given for each class as well as for government contract milk and interplant transfers. Except for 1954 and 1955, use of imported supplies is shown only for Class I. The remaining volume of imported milk not used in Class I is given as an amount used in all lower class uses. For several months during the earlier years, the total amount of milk reported used in Class I products was greater than the amount of Alabama milk used in Class I plus total imports for the month. In such instances, the volume of imports used in lower class products is listed as a negative amount.

Tables 30 through 38 give percentage utilization of Alabama produced milk by class use. As the amount of imported milk used in each class is not available, this volume is excluded from the tables.

Income received by Alabama producers is listed in Tables 39 through 46. Income data were not available for 1954. Amount paid for imported milk is not reported by handlers, as the price paid for out-of-state milk is not regulated by the Board.

Average prices per hundred pounds by class use are given in Tables

47 through 54. These prices differ from minimum prices fixed by the Board largely because the average prices shown are not adjusted to milk testing 4 per cent butterfat. Also, until 1959, the Class I price varied among regulated milk sheds. Price data indicate that the average butterfat content of milk marketed in the State is declining. For 1961, the average butterfat test for all Alabama produced milk was about 3.95 per cent. No attempt was made in preparing this report to determine the butterfat content for the period studied.

Definition of Class Uses

This section lists the number of pay classifications, products included in each class, and the effective dates of changes in classes from January, 1954, to December, 1962. Most of this section was excerpted from orders issued by the Milk Control Board.

January, 1954, to August 31, 1956 <sup>2/</sup>

Class I Milk

- (a) Raw milk
- (b) Pasteurized creamline milk
- (c) Homogenized milk
- (d) Homogenized chocolate milk
- (e) Dispenser milk
- (f) 12-1/2 per cent of sales of fortified skim milk
- (g) Whole milk buttermilk
- (h) Clabbered whole milk
- (i) Milk equivalent of half and half blend
- (j) Milk equivalent of coffee cream
- (k) Milk equivalent of whipping cream
- (l) 33-1/3 per cent of chocolate or flavored drinks

Class II Milk

That quantity of milk purchased during any pay period from producers by producer-distributors or distributors which is in excess of Class I milk as defined above.

Footnote

<sup>2/</sup> Orders were in effect prior to January, 1954.

United States Government Contract Milk

During the months of April, May, and June of each year distributors are authorized to purchase milk from producers at the current surplus or Class II price plus \$1.50 per hundred, for the sole purpose of furnishing such milk to the United States Government under contract. This price is established for these months only to enable licensed distributors to be in a competitive position to furnish milk to the United States Government on the basis of competitive bid, and will enable licensed producers to dispose of their surplus milk to best advantage. During the other 9 months of the year, July through March, producers shall be paid Class I price for milk sold under these contracts.

September 1, 1956, to December 15, 1956 3/

Class I Milk

- (a) Raw milk
- (b) Pasteurized creamline milk
- (c) Homogenized milk
- (d) Dispenser milk
- (e) 12-1/2 per cent of sales of fortified skim milk
- (f) Whole milk buttermilk
- (g) Clabbered whole milk
- (h) Milk equivalent of half and half blend
- (i) Milk equivalent of coffee cream
- (j) Milk equivalent of whipping cream
- (k) 33-1/3 per cent of chocolate or flavored drinks

---

3/ Alabama Milk Control Board, Orders 360, 361, 362, 363, 364, 365, and 360-A, August 23 and September 5, 1956.

Class II Milk

Whole milk used in processing or manufacture of buttermilk and chocolate milk.

Class III Milk

That quantity of milk purchased during any pay period from producers by producer-distributors or distributors which is in excess of Class I and II milk as defined above.

United States Government Contract Milk

(No change).

December 16, 1956, to October 31, 1959 <sup>4/</sup>

Class I Milk

- (a) Raw milk
- (b) Pasteurized creamline milk
- (c) Homogenized milk
- (d) Dispenser milk
- (e) 12-1/2 per cent of sales of fortified skim milk
- (f) Whole milk buttermilk
- (g) Clabbered whole milk
- (h) Milk equivalent of half and half blend
- (i) Milk equivalent of coffee cream
- (j) Milk equivalent of whipping cream
- (k) 33-1/3 per cent of chocolate or flavored drinks

Class II Milk

Whole milk used in chocolate milk.

---

<sup>4/</sup> Alabama Milk Control Board, Order Nos. 372, 373, 374, 375, 376 and 377, December 12, 1956.

Class III Milk

Skim milk used in buttermilk.

Class IV Milk

That quantity of milk purchased during any pay period from producers by producer-distributors or distributors, which is in excess of Classes I, II, and III milk as defined above.

United States Government Contract Milk

(No change).

November 1, 1959, to August 31, 1961 5/

Class I Milk

- (a) Raw milk
- (b) Pasteurized creamline milk
- (c) Homogenized milk
- (d) Dispenser milk
- (e) 12-1/2 per cent of sales of fortified skim milk
- (f) Whole milk buttermilk
- (g) Clabbered whole milk
- (h) Milk equivalent of half and half blend
- (i) Milk equivalent of coffee cream
- (j) Milk equivalent of whipping cream
- (k) 33-1/3 per cent sales of chocolate or flavored drinks
- (l) Chocolate milk

Class II Milk

Class II milk is skim milk which is used in the processing or manufacturing of buttermilk.

---

5/ Alabama Milk Control Board, Standing Order NS-2, September 17, 1959.

Class III Milk

Class III milk is that quantity of milk purchased during any pay period from producers by producer-distributors or distributors which is in excess of Class I and Class II milk as defined above.

United States Government Contract Milk

United States Government Contract Milk is that controlled Grade "A" milk and/or milk products sold under contract to the U. S. Government and/or its various branches or agencies wherein the resale price of such milk and/or milk products is not controlled by the orders of the Alabama State Milk Control Board.

Regulation Affecting Interplant Transfers of Milk

Effective November 1, 1959, all milk sold in bulk by one licensee plant to another shall be at the current fair market value for such milk. The selling plant receives a commission on this milk equal to 15 per cent of the price of the milk and the producer receives 85 per cent of the selling price provided the producer share is not less than the current surplus or Class III price, f.o.b. the plant. (Standing Order NS-4, September 17, 1959).

September 1, 1961, to Date 6/

Class I Milk

- (a) Raw milk
- (b) Pasteurized creamline milk
- (c) Homogenized milk
- (d) Dispenser milk
- (e) Whole milk buttermilk

---

6/ Alabama Milk Control Board, Standing Order NS-14, August 21, 1961.

- (f) Clabbered whole milk
- (g) Milk equivalent of half and half blend
- (h) Milk equivalent of coffee cream
- (i) Milk equivalent of whipping cream
- (j) Chocolate milk

Class II Milk

- (a) Fortified skim milk
- (b) Skim milk with added solids
- (c) Plain skim milk
- (d) Chocolate or flavored drinks
- (e) 99 per cent of non-fat or cultured buttermilk

Class III Milk

Class III milk is that quantity of milk purchased during any pay period from producers by producer-distributors or distributors which is in excess of Class I and Class II milk as defined above.

United States Government Contract Milk

United States Government Contract Milk is that controlled Grade "A" milk and/or milk products sold under contract to the United States Government and/or its various branches or agencies wherein the resale price of such milk and/or milk products is not controlled by the orders of the Alabama Milk Control Board (Standing Order NS-14).

Regulation Affecting Interplant Transfers of Milk

All milk sold in bulk by one licensee plant to another shall be at the current fair market value of such milk. The selling plant shall receive a commission on the milk so sold equal to 10 per cent of the price obtained for such milk, this commission being in lieu of all other charges. The producer shall receive 90 per cent of the selling

price of the bulk milk so sold and never less than the surplus price (Standing Order NS-11, effective September 1, 1961).

Procedure for Standardization

In reporting Class I sales, a credit for standardization is allowable only under the following procedure: From the total amount of Class I milk sold may be credited that quantity of skim milk derived by separation from the whole milk equivalent of half and half blend and cream included in the above computation of Class I sales. For the purpose of computing the milk equivalent of half and half blend and cream, distributors and producer-distributors shall calculate each quart of half and half blend on the basis of 5.75 pounds of milk per quart, each quart of coffee cream on the basis of 10.5 pounds of milk per quart, and whipping cream on the basis of 15.56 pounds of milk per quart. For the purpose of determining the weight of milk, fortified skim milk, plain skim, skim with added solids, chocolate milk, chocolate drink, whole milk buttermilk, and clabbered whole milk sold - - distributors and producer - - distributors shall calculate each quart of milk on the basis of 2.15 pounds per quart. For the purpose of determining the weight of non-fat or cultured buttermilk, distributors and producer-distributors shall calculate each quart of non-fat or cultured buttermilk on the basis of 2.1 pounds per quart.

Table 1. Minimum Class Prices to Producers for 100 Pounds of Milk Testing  $\frac{1}{4}$  Per Cent Butterfat, by Pay Periods and by Milk Sheds, Alabama, 1954

Pay Period	Class I		Class II
	Central, North, Northeast, East sheds	Industrial and Southwest sheds	All sheds

<sup>1/</sup> Producers were paid on the basis of two use classifications through August 31, 1956. From September 1, 1956, until December 15, 1956, producers were paid on the basis of three use classifications (see Official Order Nos. 360, 361, 362, 363, 364, and 365). Beginning December 16, 1956 producers were paid on the basis of four use classifications (see Official Order Nos. 372, 373, 374, 375, 376, and 377).

1/ See preceding table footnote 1.

2/ Effective November 1, 1959, the Central, West, East, North, and Northeast Milk Sheds were combined into one milk shed, known as the Consolidated Milk Shed. The boundaries of the Industrial, Southeast, and Southwest Milk Sheds were unchanged geographically. Effective on same date the number of general class uses were reduced to three and the same price for Class I was extended to all sheds. (Standing Orders NS-1, NS-2, and Pricing Order No. 1, September 17, 1959)

3/ Class II milk, chocolate milk, was included in Class I products beginning November 1, 1959.

<sup>1/</sup> Government Contract milk includes sales to military installations for troop issue and commissary sales and to other government installations such as veterans' hospitals and prisons.

<sup>2/</sup> In all months except April, May, and June, the government contract price was the Class I price effective in the particular Milk Shed. In April, May, and June, the Government Contract price was the surplus price plus \$1.50 per hundred pounds.

<sup>3/</sup> Effective November 1, 1959, price paid producers for government contract milk shall not be less than \$4.15 per hundred pounds and on terms and conditions as provided for in other orders of the Board (Pricing Order No. 1, September 17, 1959).

<sup>1/</sup> Price due the producer in each class on milk containing more or less than 4 per cent butterfat. Each tenth of a per cent butterfat that milk tests in excess of 4 per cent or less than 4 per cent is a butterfat point. The value of the butterfat point is added to the established price in each class for each butterfat point in excess of 4 per cent and subtracted from the established price in each class for each butterfat point less than 4 per cent.

1/ Annual report for 1957 showed that total Class I utilization in February, August, October and December exceeded Alabama produced milk used in Class I products and total imports for those months. A negative volume of imported milk used in lower class products is shown for the above months. Perhaps the volume that is unaccounted for is included in imports used in lower class products in the months following the negative amounts. No estimate was made to correct the negative volumes.

1960	154,057	10	213,322	14	367,379	24
1961	173,169	9	213,417	13	386,586	22
1962	257,902	9	217,096	12	474,998	21

1/ Source: Milk Market Information, Chattanooga, Tennessee Marketing Area, Federal Order No. 100. For December of each year the Market administrator makes a survey of producer location and volume of milk by counties in the Chattanooga milk shed. This survey is published in the following January issue of the publication listed above. In December, 1962, Alabama producers supplied 3.08 per cent of all producer milk for the Chattanooga market.
