## INTRODUCTION

This issue of **Alabama Agricultural Statistics** contains for the first time tables on pasture condition, farm disposition of principal crops, quarterly farm stocks of grains and soybeans, cash receipts by commodities, and information concerning fertilizers used on cotton.

Most tables in this issue contain data for the years 1944 through 1952. Historical series for many tables can be found in the bulletin of February 1948.

Beginning with this issue, it is planned to publish **Alabama Agricultural Statistics** annually. Until now it has appeared biennially, in 1948, 1950, and 1952.

Most of the statistics in this bulletin are estimates, not actual enumerations. To be dependable, statistics must be reasonably accurate, and to be useful they must be timely. An actual enumeration, if com-

plete, achieves accuracy, but the time required to collect and summarize the information usually makes it of very little current use and the expense is usually prohibitive. To provide statistical information that is both reasonably accurate and timely is the job of the Crop Reporting Service. This office collects information by sampling—in much the same way a cotton classer judges a whole bale by examining a small sample of it.

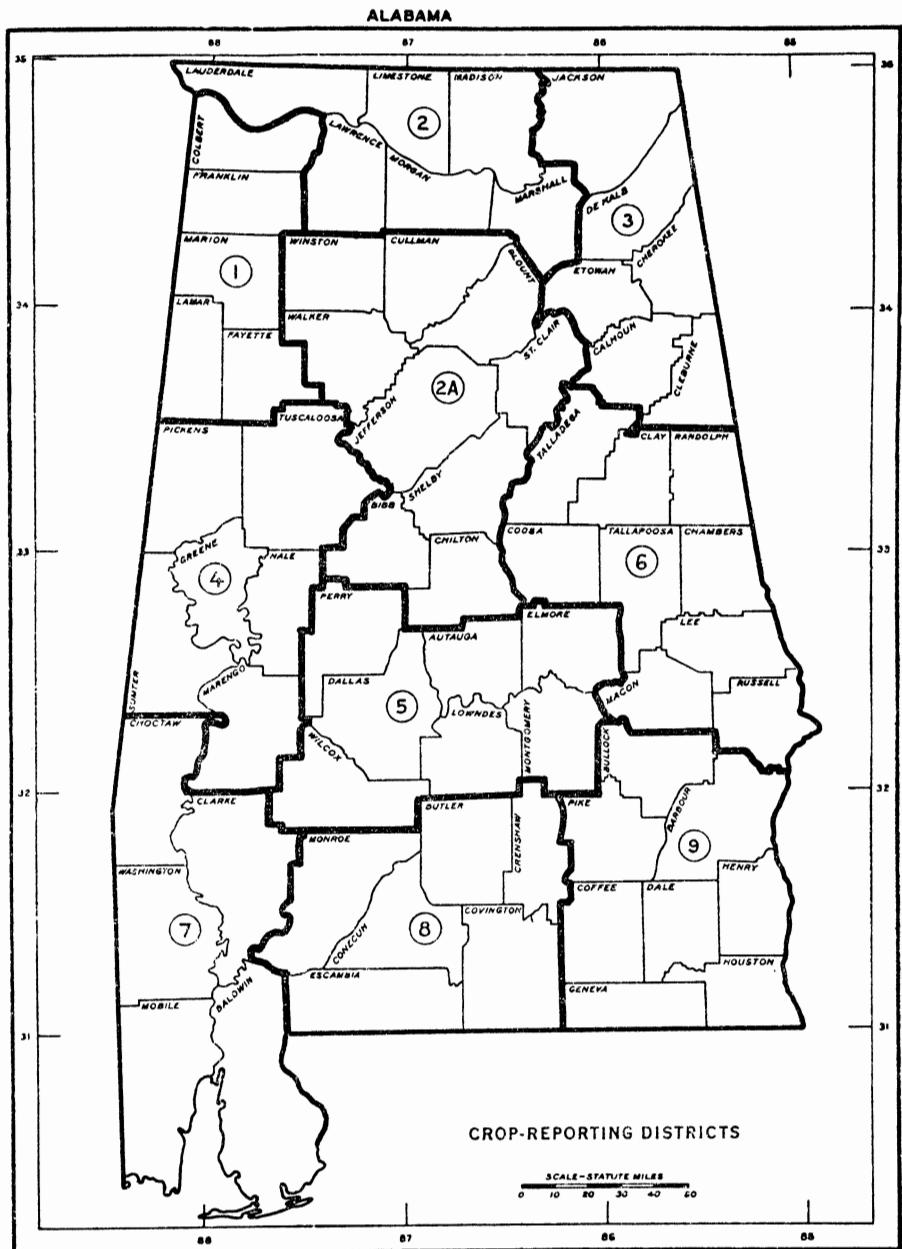

At various times during the year the Crop Reporting Service receives reports from nearly 15,000 Alabama farmers, processors, and businessmen giving information about crops, livestock, prices of things farmers buy and sell, and a score of other related subjects. These reporters serve on a voluntary basis: they are the backbone of our crop reporting system. Although crop reporters supply the basic data for these estimates, the Census and other Federal and State agencies are important sources of information. In addition, field observations and personal interviews assist the statistician in interpreting sample data.

The Alabama Cooperative Crop Reporting Service publishes official estimates of crop production, prices, and other agricultural information. Anyone desiring these reports may receive them without charge by writing to J. C. Garrett, Agricultural Statistician, Post Office Box 1071, Montgomery, Alabama. The following is a list of the more important reports and the approximate dates of their release:

Report	Released
Weekly Crop-Weather Summary .....	Each Tuesday
Broiler Chick Report .....	Each Wednesday
Mid-Month Farm Commodity Prices .....	1st of each month
Cotton Report .....	8th of the month—May, July through December
General Crop Report .....	12th of month—March through November
Livestock Slaughter Report .....	8th of month
Commercial Hatchery Report .....	20th of month
Pig Crop Report .....	June 24 and December 24
Annual Crop Summary .....	December 20
Annual Livestock Inventory .....	February 18
Prospective Plantings .....	March 20
Special reports on pasture and cover crop seeds, honey and bees, hybrid corn acreage, dairy products, farm income, truck crops, fertilizer sales, and county estimates for cotton, corn, peanuts, soybeans, cattle, milk cows, hogs, and chickens .....	Various times throughout the year

# ALABAMA AGRICULTURAL STATISTICS

3

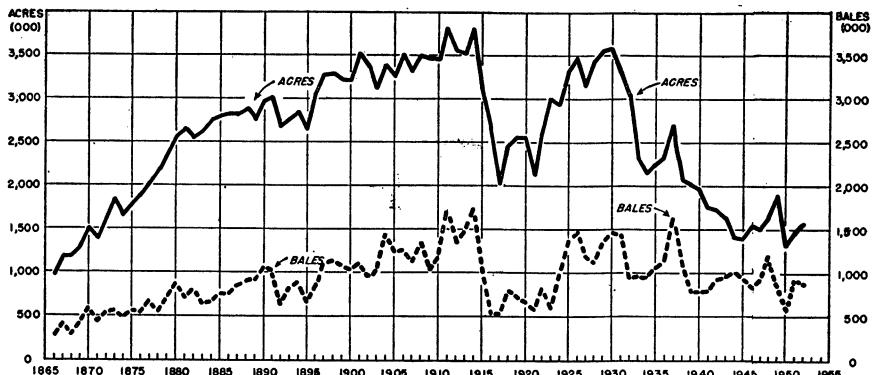

U.S. DEPARTMENT OF AGRICULTURE

BUREAU OF AGRICULTURAL ECONOMICS

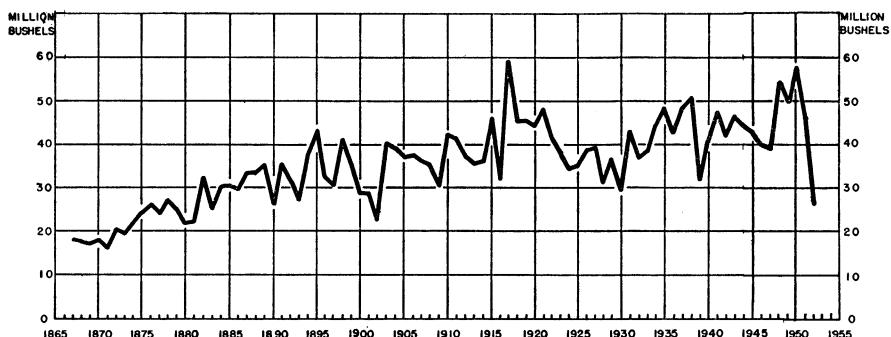

Reports from farmers are tabulated by counties and districts.  
This aids in interpreting the averages and in making  
calculations of the State estimates.

## ALABAMA AGRICULTURAL STATISTICS

### ALABAMA COTTON: ACREAGE & PRODUCTION, 1866 - 1952

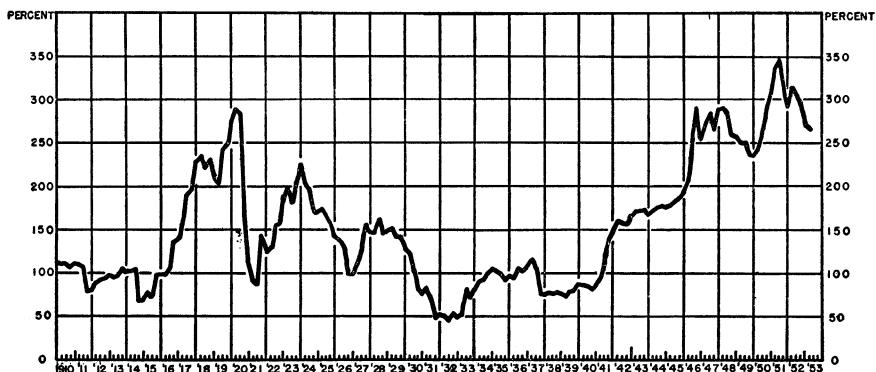

### ALABAMA CORN PRODUCTION, 1866 - 1952

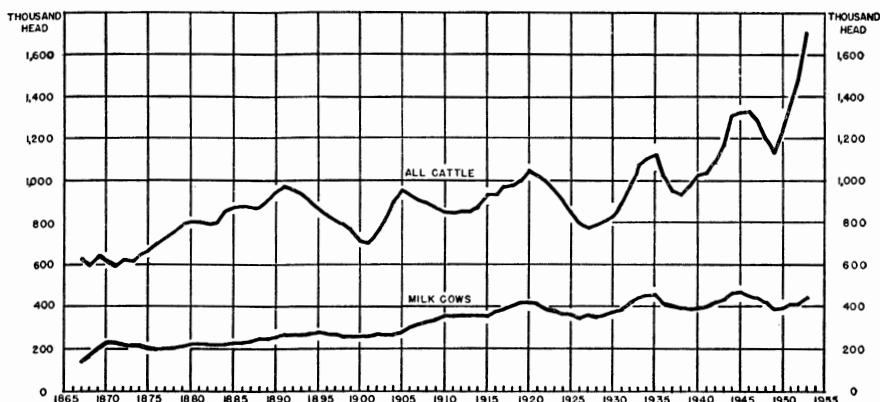

### INDEX OF PRICES RECEIVED BY ALABAMA FARMERS, 1910-1953

(AUGUST 1909-JULY 1914 = 100)

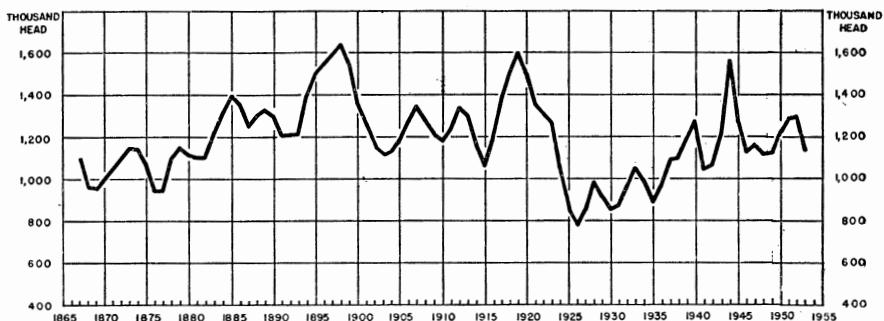

ALABAMA AGRICULTURAL STATISTICS

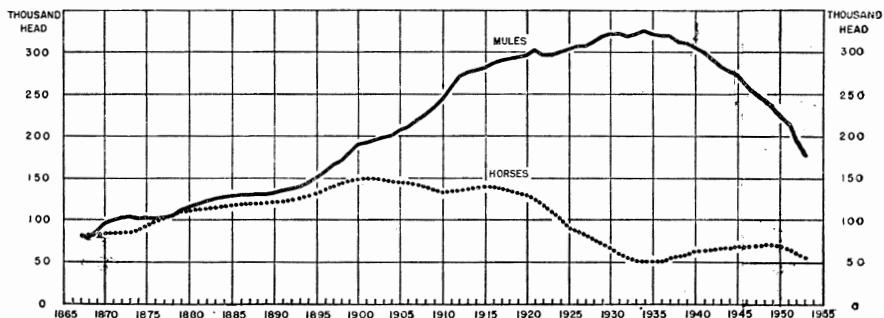

ALABAMA MILK COWS & ALL CATTLE: NUMBER ON FARMS AS OF JAN. 1, 1867-1953

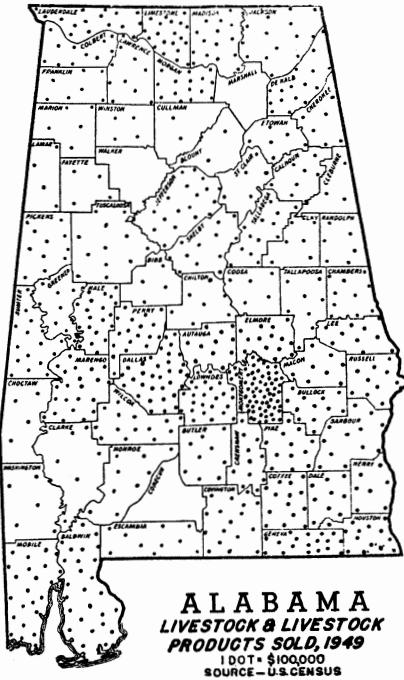

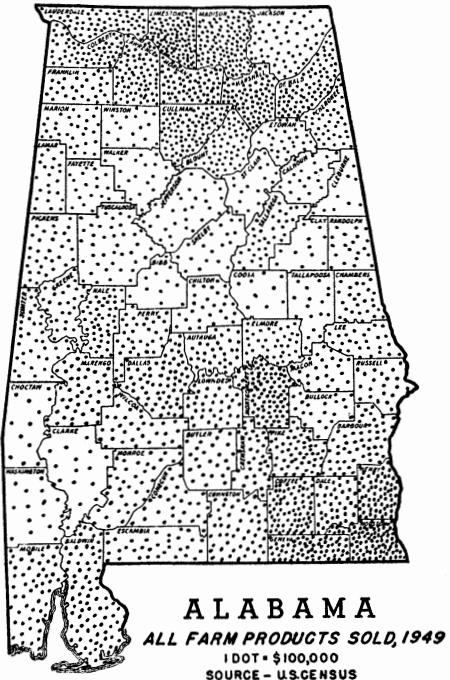

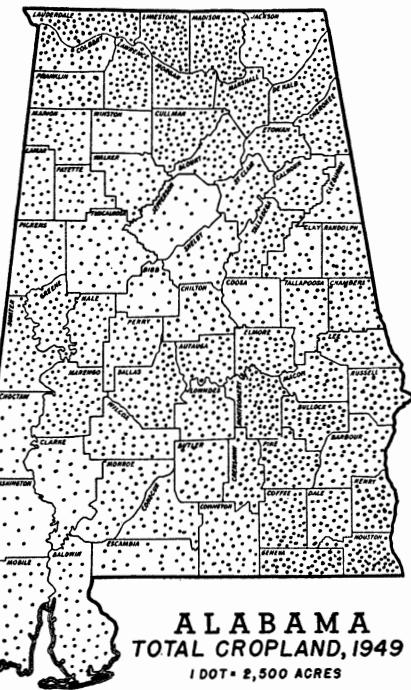

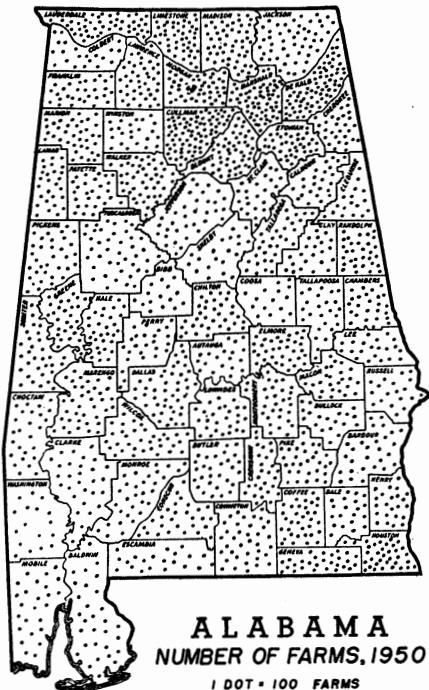

ALABAMA HOGS: NUMBER ON FARMS AS OF JAN. 1, 1867-1953

ALABAMA HORSES & MULES: NUMBER ON FARMS AS OF JAN. 1, 1867-1953

## INDEX—Continued

	Page
Cheese, American, production by months .....	45
Chickens—	
chicks hatched by commercial hatcheries, by months .....	50
commercial broilers, production and income .....	47
farm flocks, production and income .....	47
hens and pullets, average numbers, by months .....	49
inventory, January 1—	
map showing distribution .....	35
numbers, value, and classes .....	47
number, by counties .....	48
mid-month prices .....	55
Clover—timothy hay—acreage, yield, and production .....	30
Commercial vegetables—acreage, yield, production and value .....	32
Corn—	
all—	
acreage utilization .....	15
acreage, yield, production and value .....	15
acreage, yield and production, by counties .....	17
graph, production .....	4
map showing distribution .....	14
production and farm disposition .....	15
grain—	
acreage, yield and production .....	16
farm stocks, quarterly .....	16
mid-month prices .....	52
hybrid—percentage of acreage planted with hybrid seed .....	16
silage—acreage, yield and production .....	16
sweet—acreage, yield, production, and value .....	33
Cotton—	
acreage, yield, production, and value .....	10
acreage, yield, and production, by counties .....	12, 13
estimated percentage of total lint sales made by farmers	
each month .....	10
fertilizer used on cotton .....	60
grade and staple length .....	11
map showing distribution .....	14
mid-month prices .....	52
reduction from full yield from stated causes .....	10
graph, acreage and production .....	4
wage rates for picking cotton .....	60
Cottonseed—	
production, farm disposition and value .....	14
mid-month prices .....	52
Cottonseed meal—mid-month prices paid by farmers .....	56
Cowpeas—	
acreage utilization .....	27
harvested for peas—	
acreage, yield, production, and value .....	27
production and farm disposition .....	27
hay—acreage, yield and production .....	30
Cream—quantity sold and value .....	45
Crimson clover seed—acreage, yield, production, and value .....	31
Crop reporting districts, map .....	3
