Agricultural Statistician In Charge Retires

Jasper C. Garrett

After more than 36 years of public service in the field of agriculture, Mr. Jasper C. Garrett, Agricultural Statistician in Charge of the Alabama Crop and Livestock Reporting Service, retired on June 30, 1959. He had been in charge of the Montgomery office since February 1936. His introduction to Crop Estimates came in March 1928 when he was appointed an Agent under his predecessor, the late Frank Gist.

Born and reared on a farm in south Alabama, Mr. Garrett served in the 167 Infantry, 42nd (Rainbow) Division, in France during World War I. After serving his country, Mr. Garrett enrolled as a special student at Mississippi A&M College, and completed work on a BS degree in Agricultural Education in April 1923.

He was employed by the Veterans Administration prior to coming with Crop Estimates. Throughout his career in Crop Estimates, the Alabama office was run in cooperation with the Alabama Department of Agriculture and Industries. This cooperative effort resulted in more comprehensive basic crop and livestock data at the county level.

On numerous occasions Mr. Garrett served as a member of the U.S. Crop and Livestock Reporting Board. This Board approves final estimates for the various crop and livestock production items for the individual States and the U. S. He made notable contributions over the years in the preparation of crop and livestock estimates, especially in the field of cotton forecasting.

I N T R O D U C T I O N

This issue of **Alabama Agricultural Statistics** is the ninth of the series that began in 1948. Most of the tables in this issue contain data for the 10 year period 1949-58.

Alabama Agricultural Statistics brings together the more important series of current and historical data concerning agriculture in the State. An effort has been made to publish information most often requested by farmers, the general public, and government agencies.

Most of the statistics in this bulletin are estimates based on sample data and are not actual enumerations. The latest available information

has been compiled in this issue, but 1958 data are preliminary and subject to revision.

To provide statistical information that is both accurate and timely is the purpose of the Crop Reporting Service. At various times during the year the Crop Reporting Service receives many reports from Alabama farmers, processors, and other businessmen giving information about crops, livestock, prices of commodities that farmers buy and sell, and other related subjects. These reporters serve on a voluntary basis and are the backbone of our crop reporting system. Although crop reporters supply the basic data for these estimates, the Census and other Federal and State agencies are important sources of information. In addition field observations and personal interviews assist the statistician in interpreting data.

The Alabama Cooperative Crop Reporting Service publishes official estimates of crop production, prices, and other agricultural information. Anyone desiring these reports may receive them without charge by writing to George B. Strong, Agricultural Statistician, Post Office Box 1071, Montgomery, Alabama. The following is a list of the more important reports and the approximate dates of their release:

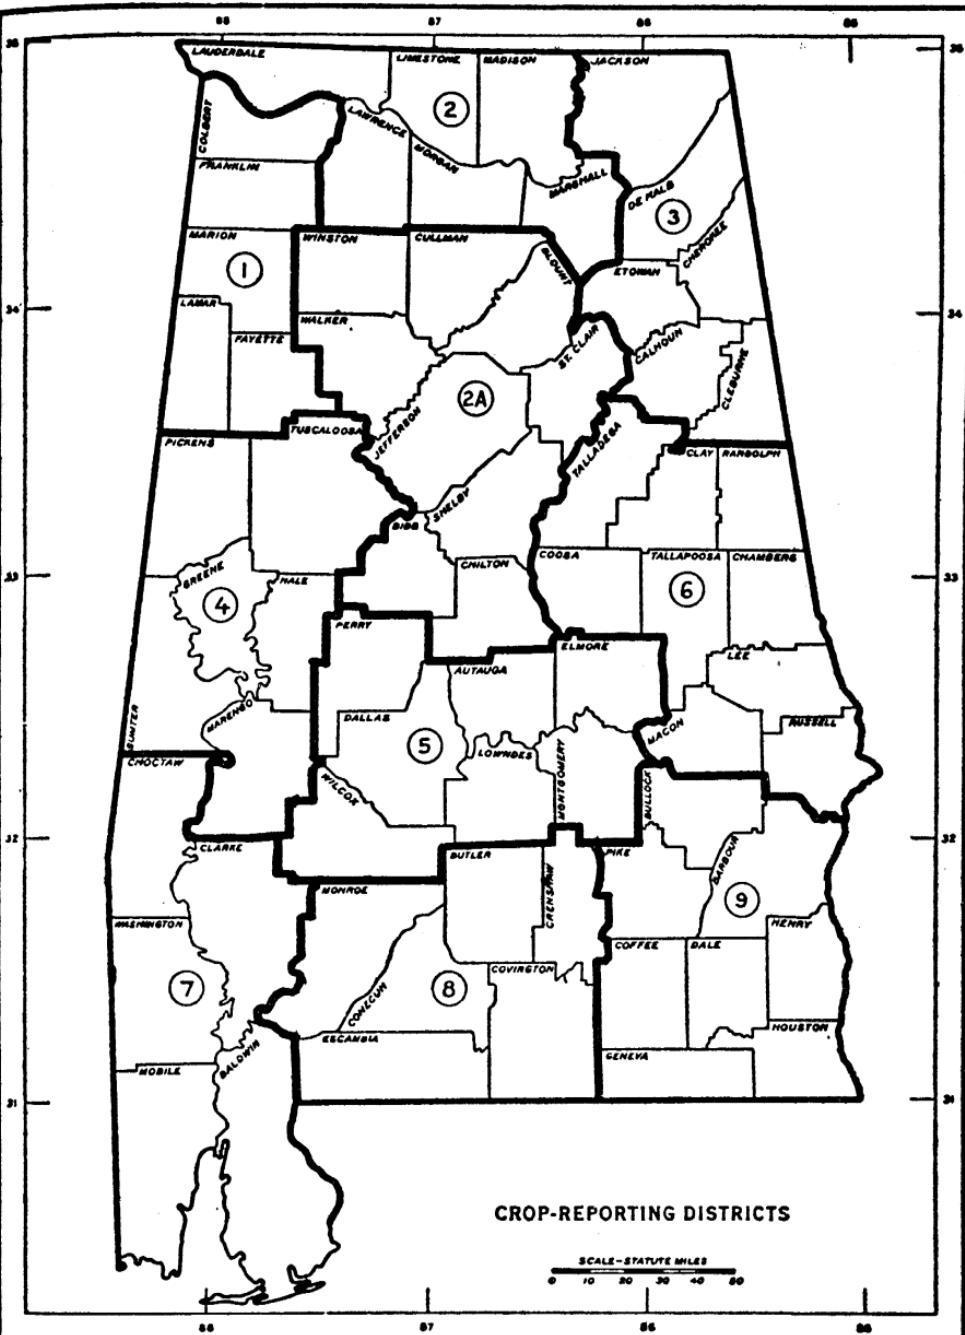

Report	Released
Weekly Crop-Weather Summary	Each Tuesday
Broiler Chick Report	Each Wednesday
Mid-Month Farm Commodity Prices	1st of each month
Cotton Report	8th of the month—May, July through December
General Crop Report	12th of month—March through November
Livestock Slaughter Report	8th of month
Commercial Hatchery Report	20th of month
Pig Crop Report	June 24 and December 24
Annual Crop Summary	December 20
Annual Livestock Inventory	February 18
Prospective Plantings	March 20

Special reports on pasture and cover crop seeds, honey and bees, hybrid corn acreage, dairy products, farm income, commercial vegetables, fertilizer sales, and county estimates for cotton, corn, peanuts, soybeans, cattle, milk cows, hogs and chickens

Various times throughout the year

ALABAMA AGRICULTURAL STATISTICS

ALABAMA

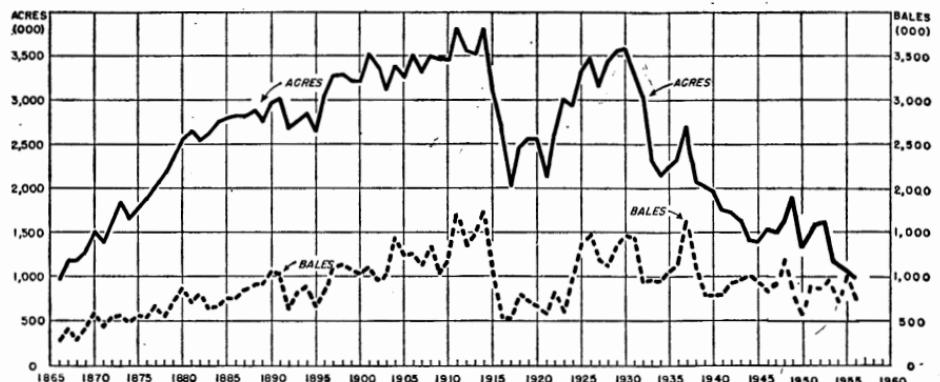

U.S. DEPARTMENT OF AGRICULTURE

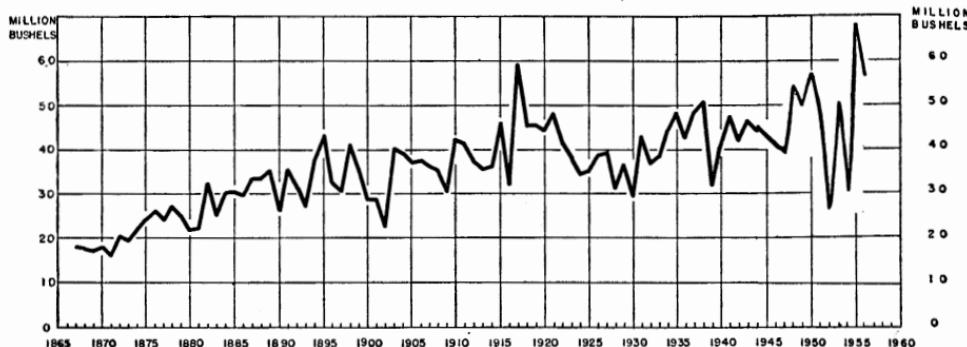

Reports from farmers are tabulated by counties and districts. This aids in interpreting the averages and in making calculations of the State estimates.
